* Nordea's policy has been to amortise resolution fees and deposit guarantee fees linearly over the year. Starting from 1 January 2019, Nordea has recognised resolution fees at the beginning of the year when the legal obligation to pay arises and presents the related expenses as "other expenses". The change mainly reflects the change in the structure of the resolution fees following the redomiciliation of the parent company of the Nordea Group from Sweden to Finland. In the unaudited consolidated interim financial statements of the Nordea Group for the nine months ended and as of 30 September 2019, the comparative figures for the nine months ended and as of 30 September 2018 and the years ended 31 December 2018 and 31 December 2017 have been restated accordingly to enhance comparability. The figures marked with an asterisk (*) have been restated to reflect the changed recognition and presentation of resolution fees.

What are the Key Risks Specific to the Issuer?

Negative economic developments and conditions in the markets in which the Nordea Group operates can adversely affect the Nordea Group's business and results of operations: the Nordea Group's performance is significantly influenced by the general economic conditions in the Nordic markets (Denmark, Finland, Norway and Sweden). Development of the economic conditions in other markets where the Nordea Group currently operates can also affect the Nordea Group's performance. Adverse economic developments have affected and may continue to affect the Nordea Group's business in a number of ways, including, among others, the income, wealth, liquidity, business and/or financial condition of the Nordea Group's customers, which, in turn, could further reduce the Nordea Group's credit quality and demand for the Nordea Group's financial products and service.

Deterioration in counterparties' credit quality may affect the Nordea Group's financial performance:

Risks arising from changes in credit quality and the recoverability of loans and amounts due from counterparties are inherent in a wide range of the Nordea Group's businesses. The Nordea Group makes provisions for loan losses in accordance with IFRS. However, the provisions made are based on available information, estimates and assumptions and are subject to uncertainty, and there can be no assurances that the provisions will be sufficient to cover the amount of loan losses as they occur. Adverse changes in the credit quality of the Nordea Group's borrowers and counterparties or a decrease in collateral values, are likely to affect the recoverability and value of the Nordea Group's assets, which in turn would adversely affect the Nordea Group's financial performance. In particular, the Nordea Group's exposure to corporate

customers is subject to adverse changes in credit quality should the economic environment in the Nordea Group's markets deteriorate.

The Nordea Group is exposed to market price risk: The Nordea Group's customer-driven trading operations and its treasury operations (where the Nordea Group holds investment and liquidity portfolios for its own account) are the key contributors to market price risk in the Nordea Group. To the extent volatile market conditions persist or recur, the fair value of the Nordea Group's bond, derivative and structured credit portfolios, as well as other classes, could fall more than estimated, and therefore cause the Nordea Group to record write-downs. In addition, because the Nordea Group's trading and investment income depends to a great extent on the performance of financial markets, volatile market conditions could result in a significant decline in the Nordea Group's trading and investment income, or result in a trading loss, which, in turn, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations.

The Nordea Group's business performance could be affected if its capital adequacy ratios are reduced or perceived to be inadequate. The Nordea Group is required to maintain certain capital adequacy ratios pursuant to EU and Finnish legislation. Local regulators may, nevertheless, require higher capital buffers than those required under current or proposed future regulations. Any such requirements, or perception by debt and equity investors, analysts or other market professionals that the capital buffers should be higher, or any concern regarding compliance with future capital adequacy requirements, could increase the Nordea Group's borrowing costs, limit its access to capital markets or result in a downgrade in its credit ratings, which could have a material adverse effect on its results of operations, financial condition and liquidity.

The Nordea Group is subject to extensive regulation that is subject to change: Companies active in the financial services industry, including the Nordea Group, operate under an extensive regulatory regime. The Nordea Group is subject to laws and regulations, administrative actions and policies as well as related oversight from the local regulators in each of the jurisdictions in which it has operations. The Nordea Group is also under the direct supervision and subject to the regulations of the European Central Bank, as a result of the size of its assets. Regulatory developments or any other requirements, restrictions, limitations on the operations of financial institutions and costs involved, or unexpected requirements under, or uncertainty with respect to, the regulatory framework to be applied to the Nordea Group, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations.

Liquidity risk is inherent in the Nordea Group's operations. Liquidity risk is the risk that the Nordea Group will be unable to meet its obligations as they fall due or meet its liquidity commitments only at an increased cost. A substantial portion of the Nordea Group's liquidity and funding requirements is met through reliance on customer deposits, as well as ongoing access to wholesale funding markets, including issuance of long-term debt market instruments, such as covered bonds. The volume of these funding sources, in particular long-term funding, may be constrained during periods of liquidity stress. Turbulence in the global financial markets and economy may adversely affect the Nordea Group's liquidity and the willingness of certain counterparties and customers to do business with the Nordea Group, which may result in a material adverse effect on the Nordea Group's business and results of operations.

Operational risks, including risks in connection with investment advice, may affect the Nordea Group's business. The Nordea Group's business operations are dependent on the ability to process a large number of complex transactions across different markets in many currencies. The Nordea Group's operations are carried out through a number of entities. Operational losses, including monetary damages, reputational damage, costs, and direct and indirect financial losses and/or write-downs, may result from many different sources. As a part of its banking and asset management activities, the Nordea Group also provides its customers with investment advice, access to internally as well as externally managed funds and serves as custodian of third party funds. In the event of losses incurred by its customers due to investment advice from the Nordea Group, or the misconduct or fraudulent actions of external fund managers, the Nordea Group's customers may seek compensation from the Nordea Group. Although the Nordea Group has implemented risk controls and taken other actions to mitigate exposures and/or losses, there can be no

assurances that such procedures will be effective in controlling each of the operational risks faced by the Nordea Group.

The performance of the Instruments will be the daily performance of the underlying asset multiplied by the predefined leverage. This means that the price of the Instruments increases when the price of the underlying asset increases, and decreases when the price of the underlying asset decreases. Currency fluctuations will also affect the performance of the investment. If the negative performance, on one single day, multiplied by the leverage is 100 or higher, the Instruments will terminate and all amount invested will be lost.
- (d) By investing in the Instruments, an investor will be assuming the risk that the Issuer will not be able to make payments on the securities in accordance with their terms. On an insolvency of the Issuer, there is a risk that the investors may lose some or all of their investment. The Instruments constitute unsecured and unsubordinated obligations of the Issuer and rank *pari passu* without any preference among themselves and at least *pari passu* with all other outstanding unsecured and unsubordinated obligations of the Issuer, present and future. The Instruments could also be subject to the bail-in power in the event of a resolution of the Issuer under directive 2014/59/EU, as implemented in Finland, and may be written down or converted into other securities (including ordinary shares) if the resolution authority determines that this is necessary in order to restore the viability of the Issuer.
- (e) The Instruments are freely transferable by their terms, although the Base Prospectus summarises certain legal restriction on the offers and sales of Instruments in certain jurisdictions.

Where will the Securities be Traded?

Application has been made for the Instruments to be admitted to listing on Nasdaq First North Denmark and to trading on Nasdaq First North Denmark effective as of the Issue Date.

What are the Key Risks that are Specific to the Securities?

Complexity of the product – The yield structure for the Instruments is sometimes complex and may contain mathematical formulae or relationships which, for an investor, may be difficult to understand and compare with other investment alternatives. It should be noted that the relationship between yield and risk may be difficult to assess.

Leverage Risks – due to the structure of the Instruments, the performance of the underlying asset will affect the price of the Instrument and may lead to larger profits or losses on invested capital than if the investment

had been made directly in the underlying asset. This is normally expressed by saying that the Instruments have a leverage effect compared with an investment in the underlying asset, i.e. a change in price (both upwards and downwards) of the underlying asset results, in percentage terms, in a greater change in the value of the Instruments. Consequently, the risk associated with an investment in such Instruments is greater than with an investment in the underlying asset. Such Instruments may become worthless.

There may be no active trading market for the Instruments - The Instruments will be new securities which may not be widely distributed and/or may be unlisted and, even if listed, may not have an active trading market. The lack of an active trading market may result in reduced liquidity for the Instruments, with the result that the investor may have to hold such Instruments until they are redeemed.

Performance of the underlying assets – under the terms of the Instruments, the holders are entitled to yield and payment of any applicable settlement amount, depending on the performance of one or more underlying assets and the applicable yield structure. The performance of the Instruments is affected by the value of the underlying assets at specific points in time during the term of the Instruments, the intensity of fluctuations in the prices of the underlying assets, expectations regarding future volatility, market interest rates, and expected dividends on the underlying assets. In some circumstances the investor may lose all of their invested amount.

Automatic early redemption – The Instruments may be redeemed automatically prior to their scheduled maturity date if certain conditions are met, typically referred to as a "knock". In some circumstances, this may result in a loss of part, or all, an investor's future coupon or interest payments in respect of the Instruments. Because certain costs and expenses are deducted from the issue price, an early redemption of the Instruments may also result in proportionately higher expenses.

Risks relating to market disruption and extraordinary events - underlying assets may be affected by disruption to their normal trading markets, or extraordinary events such as delisting, nationalisation, bankruptcy, liquidation or dilutive events affecting the relevant underlying asset. For all Instruments, events such as changes in the law or increased costs for risk management may arise. If so, the Issuer may, at its sole discretion, make any adjustments in the composition of the assets and the calculation of the yield or value of Instruments or replace one underlying asset with another underlying asset, as the Issuer deems necessary.

Shares as underlying assets – Share-linked instruments are not sponsored or promoted by the issuer of the shares. Accordingly, the issuer of the shares has no obligation to take into account the interests of investors in the Instruments and thus the actions of such share issuer might negatively affect the market value of the Instruments. An investor in the Instruments is not entitled to receive any payments or other dividends to which a direct owner of the underlying shares would otherwise be entitled.

Other risks associated with Instruments may relate, inter alia, to changes in interest rates, changes in exchange rates, whether the Issuer is entitled to redeem the Instruments prematurely, the complexity of the financial instruments, fluctuations in relevant indices, other underlying assets or the financial market, and whether repayment is dependent on circumstances other than the credit-worthiness of the Issuer.

* Nordeas politik har været at amortisere betalinger til afviklingsberedskab og betalinger til indskydergarantifond lineært hen over året. Nordea har med virkning fra 1. januar 2019 indregnet betalinger til afviklingsberedskab ved årets begyndelse, når betalingspligten indtræder, og præsenteret udgifterne hertil som "øvrige udgifter". Ændringen afspejler primært den ændring, der er sket i strukturen af betalingerne til afviklingsberedskabet, hvilken ændring er en følge af, at hjemstedet for Nordea-koncernens moderselskab er flyttet fra Sverige til Finland. I Nordea-koncernens ureviderede delårskoncernregnskab pr. 30. september 2019 er sammenligningstallene for samme periode i 2018 samt for årsafslutningerne pr. 31. december 2018 og 31. december 2017 blevet tilpasset med henblik på at øge sammenligneligheden. Tal mærket med en stjerne (*) er blevet tilpasset for at afspejle ændringerne i indregning og præsentation af betalingerne til et afviklingsberedskab.

Hvad er de vigtigste risici, der er specifikke for Udstederen?

Negative økonomiske udviklingstendenser og forhold på de markeder, hvor Nordea-koncernen opererer, kan have en negativ indvirkning på Nordea-koncernens virksomhed og driftsresultater: Nordea-koncernens resultater påvirkes i væsentlig grad af de generelle økonomiske forhold i de nordiske markeder (Danmark, Finland, Norge og Sverige). Udviklingen i de økonomiske forhold på andre markeder, hvor Nordea-koncernen p.t. driver virksomhed, kan ligeledes påvirke Nordea-koncernens resultater. Negative økonomiske udviklingstendenser har påvirket og vil fortsat kunne påvirke Nordea-koncernens virksomhed på forskellige måder, herunder kundernes indkomst, formue, likviditet, virksomhed og/eller økonomiske situation, hvilket igen kan forringe Nordea-koncernens bonitet og efterspørgslen efter Nordea-koncernens finansielle produkter og ydelser.

Forringelse af modparterers bonitet kan påvirke Nordea-koncernens økonomiske resultater: En stor del af Nordea-koncernens virksomhed er eksponeret over for risici, der måtte opstå som følge af ændringer i bonitet samt ændringer i muligheden for at inddrive lån og forfaldne beløb fra modparterne. Nordea-koncernen foretager hensættelser til imødegåelse af tab på lån i overensstemmelse med IFRS. De foretagne hensættelser er dog baseret på tilgængelige oplysninger, estimater og antagelser og er behæftet med usikkerhed, og der kan ikke være nogen garanti for, at hensættelserne er tilstrækkelige til at dække de faktiske tab på lån. Hvis der sker ændringer i boniteten hos Nordea-koncernens låntagere og modparter, eller hvis værdien af den stillede sikkerhed falder, kan dette påvirke både muligheden for at inddrive Nordea-koncernens aktiver og værdien af disse, hvilket igen vil have en negativ indvirkning på Nordea-koncernens økonomiske resultater. Nordea-koncernens eksponering over for erhvervs-kunder bliver særligt påvirket af negative ændringer i boniteten, såfremt der sker en forværring af den økonomiske situation på Nordea-koncernens markeder.

Nordea-koncernen er eksponeret over for markedskursrisici: Nordea-koncernens kundebaserede handelsaktiviteter og dens likviditetsoperationer (hvor Nordea-koncernen besidder investerings- og likviditetsporteføljer for egen regning) er de væsentligste årsager til markedskursrisikoen i Nordea-koncernen. I det omfang markedet vedvarende eller ofte er volatilt, vil dagsværdien af Nordea-koncernens porteføljer af obligationer, derivater og strukturerede lån samt også af andre kategorier kunne falde mere end estimeret og dermed medvirke til, at Nordea-koncernen må foretage nedskrivninger. Da Nordea-koncernens handels- og investeringsindtægter i vidt omfang afhænger af resultaterne på finansmarkederne, kan volatile markedsforhold derudover medføre en betydelig nedgang i Nordea-koncernens handels- og investeringsindtægter eller resultere i et handelstab, der igen kan have en væsentlig negativ indvirkning på Nordea-koncernens virksomhed, økonomiske situation og driftsresultat.

Nordea-koncernens virksomhedsresultater kan blive påvirket, hvis koncernens kapitaldækning reduceres eller opfattes som utilstrækkelig. Nordea-koncernen er forpligtet til at overholde visse krav til kapitaldækning i henhold til EU-lovgivning og finsk lovgivning. Lokale tilsynsmyndigheder kan ikke desto mindre forlange højere kapitalbuffer end dem, der kræves i henhold til enten gældende lovgivning eller forslag til fremtidig lovgivning. Såfremt der stilles sådanne krav om - eller såfremt investorer, analytikere eller andre markedsfagfolk får den opfattelse - at kapitalbufferne bør være højere, eller såfremt der opstår bekymringer vedrørende overholdelse af fremtidige krav til kapitaldækning, kan dette forøge Nordea-koncernens låneomkostninger, begrænse koncernens adgang til kapitalmarkederne eller resultere i en nedjustering af koncernens kreditvurdering, hvilket kan have en væsentlig negativ indvirkning på koncernens driftsresultater, økonomiske situation og likviditet.

Nordea-koncernen er underlagt betydelig regulering, der vil kunne ændre sig: Selskaber, som driver virksomhed inden for den finansielle sektor, herunder Nordea-koncernen, er underlagt betydelig regulering. Nordea-koncernen er omfattet af love og bestemmelser, administrative processer og politikker samt myndighedstilsyn i hver af de jurisdiktioner, hvori koncernen driver virksomhed. Nordea-koncernen er desuden på grund af størrelsen af sine aktiver under direkte tilsyn af Den Europæiske Centralbank og er underlagt dennes regulering. Reguleringsmæssige ændringer eller andre krav til, restriktioner for eller begrænsninger i driften af finansielle institutioner og de hermed forbundne omkostninger eller uventede krav eller usikkerhed i forbindelse med de lovgivningsmæssige rammer for Nordea-koncernens virksomhed kan have en væsentlig negativ indvirkning på Nordea-koncernens virksomhed, økonomiske situation og driftsresultat.

Nordea-koncernens virksomhedsaktiviteter er uløseligt forbundet med en likviditetsrisiko. Likviditetsrisiko betyder risikoen for, at Nordea-koncernen ikke er i stand til at opfylde sine forpligtelser, efterhånden som de forfalder, eller kun vil kunne overholde sine likviditetsforpligtelser med forøgede omkostninger. En væsentlig del af Nordea-koncernens likviditets- og kapitalkrav opfyldes gennem kundeindlån samt løbende adgang til kapitalmarkeder, herunder udstedelse af langfristede gældsinstrumenter som f.eks. særligt dækkede obligationer. Omfanget af disse kapitalkilder, især langsigtet kapital, kan være begrænset i perioder med likviditetspres. Turbulens på de globale finansielle markeder og den globale økonomi kan have en negativ indvirkning på Nordea-koncernens likviditet og på viljen hos visse modparter og kunder til at samarbejde med Nordea-koncernen, hvilket kan medføre en væsentlig negativ indvirkning på Nordea-koncernens virksomhed og driftsresultat.

Operationelle risici, herunder risici i forbindelse med investeringsrådgivning, kan påvirke Nordea-koncernens virksomhed. Nordea-koncernens virksomhedsaktiviteter er afhængige af, at det er muligt at gennemføre et stort antal komplekse transaktioner på tværs af forskellige markeder i mange valutaer. Nordea-koncernens aktiviteter udføres via et antal virksomheder. Tab som følge af operationelle risici, herunder økonomisk erstatning, skade på omdømme, omkostninger samt direkte og indirekte økonomiske tab og/eller nedskrivninger kan være forårsaget af mange forskellige omstændigheder. Nordea-koncernen yder som led i sin bank- og kapitalforvaltningsvirksomhed også investeringsrådgivning til sine kunder, giver kunderne adgang til både internt og eksternt forvaltede midler, og fungerer som depotbank for midler fra tredjemand. Såfremt kunderne lider tab som følge af investeringsrådgivning fra Nordea-koncernen eller som følge af eksterne kapitalforvalteres misligholdelse eller svigagtige handlinger, kan Nordea-koncernens kunder søge erstatning fra Nordea-koncernen. Selvom Nordea-koncernen har implementeret risikostyring og taget andre skridt til at

minimere koncernens eksponering og/eller tab, kan der ikke gives nogen garanti for, at disse procedurer effektivt vil kunne håndtere hver enkelt af de operationelle risici, som Nordea-koncernen er eksponeret over for.

3. Nøgleoplysninger om værdipapirerne

Hvad er værdipapirernes vigtigste karakteristika?

<u>Type og klasse af Instrumenter</u>	<u>ISIN</u>	<u>Valuta</u>	<u>Antal Instrumenter</u>	<u>Udløbsdato</u>
Bull Certifikat med aktier som underliggende	DK0060833317	DKK	500000	Ingen fast udløbsdato

Bull Certificate: Instrumenternes afkast afhænger af det underliggende aktivs resultater. Kursen på Instrumenterne vil blive reguleret for udbytte i det underliggende aktiv. Instrumenternes resultater vil være det underliggende aktivs daglige resultater multipliceret med den foruddefinerede gearing. Dette betyder, at kursen på Instrumenterne stiger, når kursen på det underliggende aktiv stiger, og den falder, når kursen på det underliggende aktiv falder. Valutaudsving vil også have en indvirkning på investeringens resultater. Hvis investeringens negative resultater - på en enkelt dag - multipliceret med gearingen giver 100 eller mere, bortfalder Instrumenterne, og hele det investerede beløb går tabt.

Ved at investere i Instrumenterne påtager investor sig den risiko, at Udstederen ikke er i stand til at foretage betalinger i relation til værdipapirerne i overensstemmelse med deres vilkår. I tilfælde af Udstederens insolvens er der en risiko for, at investorerne kan tabe hele eller en del af deres investeringer. Instrumenterne er usikrede og ikke-efterstillede forpligtelser for Udstederen. De er indbyrdes sideordnede og som minimum sideordnede med alle Udstederens øvrige udestående, usikrede og ikke-efterstillede forpligtelser, nuværende såvel som fremtidige. Instrumenterne kan også være omfattet af bail-in-beføjelsen i tilfælde af afvikling af Udstederen i henhold til direktiv 2014/59/EU, som implementeret i Finland, og kan nedskrives eller konverteres til andre værdipapirer (inklusive ordinære aktier), hvis afviklingsmyndigheden bestemmer, at dette er nødvendigt for at genoprette Udstederens levedygtighed.

Instrumenterne er frit omsættelige i henhold til deres vilkår, selvom Basisprospektet dog opsummerer visse juridiske restriktioner for udbud og salg af Instrumenter i visse jurisdiktioner.

Hvor vil værdipapirerne blive handlet?

Der er indgivet ansøgning om, at Instrumenterne optages til notering på Nasdaq First North Denmark og til handel på Nasdaq First North Denmark med virkning fra Udstedelsesdatoen.

Hvad er de vigtigste risici, der er specifikke for værdipapirerne?

Produktets kompleksitet - Afkaststrukturen for Instrumenterne er til tider kompleks og kan indeholde matematiske formler eller sammenhænge, som kan være svære for en investor at forstå og sammenligne med andre investeringsmuligheder. Særligt kan sammenhængen mellem afkast og risiko være svær at vurdere.

Gearingsrisici – Instrumenterne har en struktur, der betyder, at det underliggende aktivs resultater påvirker kursen på Instrumentet, hvilket kan medføre et tab eller en fortjeneste, som er større, end hvis investoren havde investeret direkte i det underliggende aktiv. Man udtrykker det normalt på den måde, at Instrumenterne har en gearingeffekt i forhold til at investere i det underliggende aktiv, dvs. at en ændring i kursen (i op- eller nedadgående retning) på det underliggende aktiv medfører en procentuel større ændring i Instrumenternes værdi. Der er derfor en større risiko forbundet med at investere i Instrumenterne end ved at investere i det underliggende aktiv. Sådanne Instrumenter kan blive værdiløse.

Der er måske ikke noget aktivt marked for handel med Instrumenterne - Instrumenterne er nye værdipapirer, som måske ikke sælges i større omfang, og/eller som kan være unoterede, og som måske ikke har noget aktivt marked for handel med dem (heller ikke selvom de evt. er noterede). Hvis der ikke er noget aktivt marked for handel med Instrumenterne, kan det betyde, at de ikke er særligt likvide, hvorfor investoren kan være nødt til at beholde dem indtil indfrielsestidspunktet.

Resultaterne af de underliggende aktiver - I henhold til Instrumenternes vilkår er indehaverne berettiget til afkast og udbetaling af et eventuelt afregningsbeløb afhængig af de resultater, der opnås af et eller flere underliggende aktiver, samt af den gældende afkaststruktur. Instrumenternes resultater påvirkes af værdien af de underliggende aktiver på bestemte tidspunkter i Instrumenternes løbetid, graden af kursudsving på de underliggende aktiver, forventningerne til den fremtidige volatilitet, markedsrenten og de forventede udbytter af de underliggende aktiver. I nogle tilfælde kan investoren tabe hele det investerede beløb.

Automatisk førtidig indfrielse - Instrumenterne vil kunne blive indfriet automatisk inden det planlagte udløbstidspunkt, hvis visse betingelser er opfyldt (typisk benævnt et "knock"). Under nogle omstændigheder kan dette resultere i tab af alle eller en del af investorens fremtidige kupon- eller rentebetalinger vedrørende Instrumenterne. Da visse omkostninger og udgifter fratrækkes udstedelseskursen, kan en førtidig indfrielse af Instrumenterne også resultere i forholdsvis højere udgifter.

Risici i relation til markedsforstyrrelser og ekstraordinære hændelser - Underliggende aktiver kan blive påvirket af forstyrrelser på deres normale handelsmarkeder eller af ekstraordinære hændelser som f.eks. afnotering, nationalisering, konkurs, likvidation eller andre forhold, der udvander de pågældende underliggende aktivers værdi. For alle Instrumenter kan der forekomme hændelser som f.eks. ændringer i lovgivningen eller stigninger i omkostningerne til risikostyring. I sådanne tilfælde kan Udstederen vælge at foretage ændringer i sammensætningen af aktiverne og i beregningen af Instrumenternes afkast eller værdi eller at erstatte ét underliggende aktiv med et andet, hvis Udstederen anser dette for at være nødvendigt.

Aktier som underliggende aktiver - Instrumenter med aktier som underliggende aktiver er ikke sponsoreret eller støttet af udstederen af aktierne. Udstederen af aktierne har således ikke pligt til at varetage de interesser, som investorerne i Instrumenterne har, og derfor kan udstederens handlinger påvirke markedsværdien af Instrumenterne i negativ retning. En investor i Instrumenterne har ikke ret til at modtage udbetalinger eller andre udbytteudlodninger på lige fod med investorer, der har investeret direkte i de underliggende aktier.

Øvrige risici i forbindelse med Instrumenterne kan bl.a. relatere sig til renteændringer, valutakursændringer, hvorvidt Udstederen er berettiget til at indfri Instrumenterne førtidigt, de finansielle instrumenters kompleksitet, udsving i relevante indekser, andre underliggende aktiver eller det finansielle marked, samt hvorvidt indfrielse afhænger af andre faktorer end Udstederens kreditværdighed.
