

IMPORTANT NOTICE

In accessing the attached final terms (the "Final Terms") you agree to be bound by the following terms and conditions.

EU MiFID II product governance – Solely for the purposes of the manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in Directive 2014/65/EU (as amended, "MiFID II"); (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate; and (iii) the following channels for distribution of the Notes to retail clients are appropriate – investment advice, portfolio management and non-advised sales, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable. Any person subsequently offering, selling or recommending the Notes (a "distributor") should take into consideration the manufacturer's target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels.

PROHIBITION OF SALES TO UK RETAIL INVESTORS – The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom ("UK"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 ("EUWA"); (ii) a customer within the meaning of the provisions of the FSMA and any rules or regulations made under the Financial Services and Markets Act 2000 (as amended, the "FSMA") to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. Consequently no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "UK PRIIPs Regulation") for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

The information contained in the Final Terms may be addressed to and/or targeted at persons who are residents of particular countries only as specified in the Final Terms and/or in the Base Prospectus (as defined in the Final Terms) and is not intended for use and should not be relied upon by any person outside those countries and/or to whom the offer contained in the Final Terms is not addressed. **Prior to relying on the information contained in the Final Terms, you must ascertain from the Final Terms and/or the Base Prospectus whether or not you are an intended addressee of the information contained therein.**

Neither the Final Terms nor the Base Prospectus constitutes an offer to sell or the solicitation of an offer to buy securities in the United States or in any other jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration, exemption from registration or qualification under the securities law of any such jurisdiction.

The securities described in the Final Terms and the Base Prospectus have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (the "Securities Act") and may not be offered or sold directly or indirectly within the United States or to, or for the account or benefit of, U.S. persons or to persons within the United States of America (as such terms are defined in Regulation S under the Securities Act ("Regulation S")). The securities described in the Final Terms will only be offered in offshore transactions to non-U.S. persons in reliance upon Regulation S.

What are the Key Risks Specific to the Issuer?

The global coronavirus outbreak, which has negatively impacted the economies exposed to the outbreak, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations and adversely affect the Nordea Group's ability to access capital and liquidity: The outbreak of COVID 19 (also commonly referred to as the "coronavirus") spread globally in the first half of 2020 and disrupted various markets and has resulted in significant uncertainty about the development of the economies affected by the outbreak both in Europe and elsewhere. The majority of the Nordea Group's operations are concentrated in the Nordic countries that have been, and are expected to continue to be, exposed to the coronavirus outbreak in a similar manner as a number of other European countries. The Nordea Group is affected by the coronavirus outbreak through its direct and indirect impact on the customers, counterparties, employees and other stakeholders of the Nordea Group, both in the Nordic countries and elsewhere, as a result of, among others, public health measures, such as business closings and restrictions on travel and gatherings. There can also be no assurances that the adverse impact of the coronavirus outbreak will not lead to a tightening of liquidity conditions or funding uncertainty, or adversely affect the credit ratings assigned to Nordea or its subsidiaries. New regulatory requirements may also be introduced on the future to address any liquidity concerns or other adverse effects the coronavirus outbreak may have on the financial sector, and financial institutions, such as the Nordea Group, could also become subject to related heightened supervisory demands. Any future adverse consequences related to the coronavirus outbreak not yet known, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations and adversely affect the Nordea Group's ability to, among others, meet its financial targets or access capital and liquidity on financial terms acceptable to the Nordea Group.

Negative economic developments and conditions in the markets in which the Nordea Group operates can adversely affect the Nordea Group's business and results of operations: The Nordea Group's performance is significantly influenced by the general economic conditions in the Nordic markets (Denmark, Finland, Norway and Sweden). Development of the economic conditions in other markets where the Nordea Group currently operates can also affect the Nordea Group's performance. Adverse economic developments have affected and may continue to affect the Nordea Group's business in a number of ways, including, among others, the income, wealth, liquidity, business and/or financial condition of the Nordea Group's customers, which, in turn, could further reduce the Nordea Group's credit quality and demand for the Nordea Group's financial products and services. For example, the coronavirus outbreak and the preventive measures implemented in the Nordic countries and elsewhere to contain its spread could have an

adverse effect on borrowers, which, in turn, could result in decreased credit quality and increased provisioning levels.

The Nordea Group is exposed to market price risk: The Nordea Group's customer-driven trading operations and its treasury operations (where the Nordea Group holds investment and liquidity portfolios for its own account) are the key contributors to market price risk in the Nordea Group. To the extent volatile market conditions persist or recur, the fair value of the Nordea Group's bond, derivative and structured credit portfolios, as well as other classes, could fall more than estimated, and therefore cause the Nordea Group to record write-downs. In addition, because the Nordea Group's trading and investment income depends to a great extent on the performance of financial markets, volatile market conditions could result in a significant decline in the Nordea Group's trading and investment income, or result in a trading loss, which, in turn, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations.

The Nordea Group is subject to extensive regulation that is subject to change: Companies active in the financial services industry, including the Nordea Group, operate under an extensive regulatory regime. The Nordea Group is subject to laws and regulations, administrative actions and policies as well as related oversight from the local regulators in each of the jurisdictions in which it has operations. The Nordea Group is also under the direct supervision and subject to the regulations of the European Central Bank, as a result of the size of its assets. Regulatory developments or any other requirements, restrictions, limitations on the operations of financial institutions and costs involved, or unexpected requirements under, or uncertainty with respect to, the regulatory framework to be applied to the Nordea Group, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations.

Liquidity risk is inherent in the Nordea Group's operations. Liquidity risk is the risk that the Nordea Group will be unable to meet its obligations as they fall due or meet its liquidity commitments only at an increased cost. A substantial portion of the Nordea Group's liquidity and funding requirements is met through reliance on customer deposits, as well as ongoing access to wholesale funding markets, including issuance of long-term debt market instruments, such as covered bonds. The volume of these funding sources, in particular long-term funding, may be constrained during periods of liquidity stress. Turbulence in the global financial markets and economy may adversely affect the Nordea Group's liquidity and the willingness of certain counterparties and customers to do business with the Nordea Group, which may result in a material adverse effect on the Nordea Group's business and results of operations.

- (a) **Mini Future Long:** the return of the Instruments depends on the performance of the underlying asset during the lifetime of the Instruments. The price of the Instruments will be adjusted for dividends in the underlying asset. The price of the Instruments will increase when the price of the underlying asset increases, and decrease when the price of the underlying asset decreases. If the price of the underlying asset is at or below the stop-loss level, the Instruments will terminate and some or all of the amount invested will be lost. The stop-loss level and the financing level will be adjusted on a daily basis. Currency fluctuations will also affect the performance of the Instruments.
- (b) By investing in the Instruments, an investor will be assuming the risk that the Issuer will not be able to make payments on the securities in accordance with their terms. On an insolvency of the Issuer, there is a risk that the investors may lose some or all of their investment. The Instruments constitute unsecured and unsubordinated obligations of the Issuer and rank *pari passu* without any preference among themselves and at least *pari passu* with all other outstanding unsecured and unsubordinated obligations of the Issuer, present and future. The Instruments could also be subject to the bail-in power in the event of a resolution of the Issuer under directive 2014/59/EU, as implemented in Finland, and may be written down or converted into other securities (including ordinary shares) if the resolution authority determines that this is necessary in order to restore the viability of the Issuer.
- (c) The Instruments are freely transferable by their terms, although the Base Prospectus summarises certain legal restriction on the offers and sales of Instruments in certain jurisdictions.

Where will the Securities be Traded?

Application has been made for the Instruments to be admitted to listing on Nasdaq First North Denmark and to trading on Nasdaq First North Denmark effective as of the Issue Date.

What are the Key Risks that are Specific to the Securities?

Complexity of the product – The yield structure for the Instruments is sometimes complex and may contain mathematical formulae or relationships which, for an investor, may be difficult to understand and compare with other investment alternatives. It should be noted that the relationship between yield and risk may be difficult to assess.

Leverage Risks – due to the structure of the Instruments, the performance of the underlying asset will affect the price of the Instrument and may lead to larger profits or losses on invested capital than if the investment had been made directly in the underlying asset. This is normally expressed by saying that the Instruments have a leverage effect compared with an investment in the underlying asset, i.e. a change in price (both upwards and downwards) of the underlying asset results, in percentage terms, in a greater change in the value of the Instruments. Consequently, the risk associated with an investment in such Instruments is greater than with an investment in the underlying asset. Such Instruments may become worthless.

There may be no active trading market for the Instruments - The Instruments will be new securities which may not be widely distributed and/or may be unlisted and, even if listed, may not have an active trading market. The lack of an active trading market may result in reduced liquidity for the Instruments, with the result that the investor may have to hold such Instruments until they are redeemed.

Performance of the underlying assets – under the terms of the Instruments, the holders are entitled to yield and payment of any applicable settlement amount, depending on the performance of one or more underlying

assets and the applicable yield structure. The performance of the Instruments is affected by the value of the underlying assets at specific points in time during the term of the Instruments, the intensity of fluctuations in the prices of the underlying assets, expectations regarding future volatility, market interest rates, and expected dividends on the underlying assets. In some circumstances the investor may lose all of their invested amount.

Automatic early redemption – The Instruments may be redeemed automatically if certain conditions are met, typically referred to as a "knock". In some circumstances, this may result in a loss of part, or all, an investor's future coupon or interest payments in respect of the Instruments. Because certain costs and expenses are deducted from the issue price, an early redemption of the Instruments may also result in proportionately higher expenses.

Risks relating to market disruption and extraordinary events - underlying assets may be affected by disruption to their normal trading markets, or extraordinary events such as delisting, nationalisation, bankruptcy, liquidation or dilutive events affecting the relevant underlying asset. For all Instruments, events such as changes in the law or increased costs for risk management may arise. If so, the Issuer may, at its sole discretion, make any adjustments in the composition of the assets and the calculation of the yield or value of Instruments or replace one underlying asset with another underlying asset, as the Issuer deems necessary.

Risks relating to the underlying asset – the return and value of the Instruments will depend on the performance of the Underlying Asset. As the performance of the Instruments are linked to the performance of the Underlying Asset, the investor may risk losing the entire invested amount. The value of an Instrument may, in addition to changes in the price of the Underlying Asset, be impacted by the intensity of the price fluctuations of the Underlying Asset (commonly referred to as volatility), expectations regarding future volatility, market interest rates and expected dividends or other distributions on the Underlying Asset. Investors should be aware that the market price of the Instruments may be volatile due to the performance of the Underlying Asset, and the amount payable under the Instrument to the investor may be less than the original amount paid for an Instrument, or even zero. Changes in the price of the Underlying Asset may not be directly correlated with the price of the Instrument and a small movement in the value of the Underlying Asset may result in a significant change in the value of the Instrument. The Issuer may not be able to control the price or composition of the Underlying Assets. An investor in an Instrument does not have rights that a direct owner of the Underlying Asset would be entitled to, for example receiving dividends or other payments associated with the holding of the Underlying Asset. If the Underlying Asset(s) is denominated in a currency that is different from the currency of the Instruments, investors in the Instruments are also subject to foreign exchange risk and may suffer significant losses even if the value of the Underlying Asset in its currency of denomination is unchanged or has performed favourably for the investor. Previous foreign exchange rates are not necessarily indicative of future foreign exchange rates.

Other risks associated with Instruments may relate, inter alia, to changes in interest rates, changes in exchange rates, whether the Issuer is entitled to redeem the Instruments prematurely, the complexity of the financial instruments, fluctuations in relevant indices, other underlying assets or the financial market, and whether repayment is dependent on circumstances other than the credit-worthiness of the Issuer.

Hvad er de vigtigste risici, der er specifikke for Udstederen?

Det globale udbrud af coronavirus, som har haft en negativ påvirkning på økonomierne berørt af udbruddet, kan have en væsentlig negativ indvirkning på Nordea-koncernens virksomhed, økonomiske situation og driftsresultater og negativt påvirke Nordea-koncernens evne til at tilgå kapital og likviditet: Udbruddet af COVID-19 (som også ofte omtales som "coronavirus") spredte sig globalt i første halvdel af 2020 og skabte uro på flere markeder og har resulteret i betydelig usikkerhed om udviklingen i de økonomier, der er berørt af udbruddet både i Europa og andre steder. Størstedelen af Nordea-koncernens forretninger er koncentreret i de nordiske lande som har været, og som forventes stadig at blive, berørt af udbruddet af coronavirus i samme grad som en række andre europæiske lande. Nordea-koncernen påvirkes af udbruddet af coronavirus gennem dens direkte og indirekte påvirkning på kunder, modparter, medarbejdere og andre interessenter i Nordea-koncernen, både i de nordiske lande og andre steder, som et resultat af, blandt andet, offentlige tiltag til gavn for folkesundheden som lukning af butikker og begrænsninger på rejseaktivitet og forsamlinger. Det er ikke sikkert om coronavirusudbruddets negative indvirkning vil føre til en stramning af likviditetsforhold eller usikkerhed om funding eller negativ indvirkning på Nordeas eller Nordeas datterselskabers kreditrating. I fremtiden kan nye regulatoriske krav blive indført for at adressere eventuelle likviditetsproblemer eller lignende negative følger som coronavirusudbruddet kan have på den finansielle sektor og finansielle institutter som Nordea-koncernen kan blive underlagt skærpede tilsyns krav. Enhver fremadrettet negativ konsekvens af coronavirus, der endnu ikke er kendt, kan have væsentlig negativ påvirkning på Nordea-koncernens virksomhed, økonomiske situation og driftsresultater og negativt påvirke blandt andet Nordea-koncernens evne til at tilgå kapital og likviditet på finansielle vilkår der er acceptable for Nordea-koncernen.

Negative økonomiske udviklingstendenser og forhold på de markeder, hvor Nordea-koncernen opererer, kan have en negativ indvirkning på Nordea-koncernens virksomhed og driftsresultater: Nordea-koncernens resultater påvirkes i væsentlig grad af de generelle økonomiske forhold i de nordiske markeder (Danmark, Finland, Norge og Sverige). Udviklingen i de økonomiske forhold på andre markeder, hvor Nordea-koncernen p.t. driver virksomhed, kan ligeledes påvirke Nordea-koncernens resultater. Negative økonomiske udviklingstendenser har påvirket og vil fortsat kunne påvirke Nordea-koncernens virksomhed på forskellige måder, herunder kundernes indkomst, formue, likviditet, virksomhed og/eller økonomiske situation, hvilket igen kan forringe Nordea-koncernens bonitet og efterspørgslen efter Nordea-koncernens finansielle produkter og ydelser. For eksempel, udbruddet af coronavirus og de præventive tiltag som er implementeret i de nordiske lande og andre steder for at begrænse spredningen af coronavirus kan have en negativ påvirkning på Nordea-koncernens låntagere, hvilket kan resultere i en lavere kredit kvalitet og øgede kapitalkrav.

Nordea-koncernen er eksponeret over for markedskursrisici: Nordea-koncernens kundebaseerede handelsaktiviteter og dens likviditetsoperationer (hvor Nordea-koncernen besidder investerings- og likviditetsporteføljer for egen regning) er de væsentligste årsager til markedskursrisikoen i Nordea-koncernen. I det omfang markedet vedvarende eller ofte er volatilt, vil dagsværdien af Nordea-koncernens porteføljer af obligationer, derivater og strukturerede lån samt også af andre kategorier kunne falde mere end estimeret og dermed medvirke til, at Nordea-koncernen må foretage nedskrivninger. Da Nordea-koncernens handels- og investeringsindtægter i vidt omfang afhænger af resultaterne på finansmarkederne, kan volatile markedsforhold derudover medføre en betydelig nedgang i Nordea-koncernens handels- og investeringsindtægter eller resultere i et handelstab, der igen kan have en væsentlig negativ indvirkning på Nordea-koncernens virksomhed, økonomiske situation og driftsresultat.

Nordea-koncernen er underlagt betydelig regulering, der vil kunne ændre sig: Selskaber, som driver virksomhed inden for den finansielle sektor, herunder Nordea-koncernen, er underlagt betydelig regulering. Nordea-koncernen er omfattet af love og bestemmelser, administrative processer og politikker samt myndighedstilsyn i hver af de jurisdiktioner, hvori koncernen driver virksomhed. Nordea-koncernen er desuden på grund af størrelsen af sine aktiver under direkte tilsyn af Den Europæiske Centralbank og er underlagt dennes regulering. Reguleringsmæssige ændringer eller andre krav til, restriktioner for eller begrænsninger i driften af finansielle institutioner og de hermed forbundne omkostninger eller uventede krav eller usikkerhed i forbindelse

med de lovgivningsmæssige rammer for Nordea-koncernens virksomhed kan have en væsentlig negativ indvirkning på Nordea-koncernens virksomhed, økonomiske situation og driftsresultat.

Nordea-koncernens virksomhedsaktiviteter er uløseligt forbundet med en likviditetsrisiko. Likviditetsrisiko betyder risikoen for, at Nordea-koncernen ikke er i stand til at opfylde sine forpligtelser, efterhånden som de forfalder, eller kun vil kunne overholde sine likviditetsforpligtelser med forøgede omkostninger. En væsentlig del af Nordea-koncernens likviditets- og kapitalkrav opfyldes gennem kundeindlån samt løbende adgang til kapitalmarkeder, herunder udstedelse af langfristede gældsinstrumenter som f.eks. særligt dækkede obligationer. Omfanget af disse kapitalkilder, især langsigtet kapital, kan være begrænset i perioder med likviditetspres. Turbulens på de globale finansielle markeder og den globale økonomi kan have en negativ indvirkning på Nordea-koncernens likviditet og på viljen hos visse modparter og kunder til at samarbejde med Nordea-koncernen, hvilket kan medføre en væsentlig negativ indvirkning på Nordea-koncernens virksomhed og driftsresultat.

- (a) **Mini Future Long:** Instrumenternes afkast afhænger af det underliggende aktivs resultater i Instrumenternes levetid. Kursen på Instrumenterne vil blive reguleret for udbytte i det underliggende aktiv. Kursen på Instrumenterne stiger, når kursen på det underliggende aktiv stiger, og den falder, når kursen på det underliggende aktiv falder. Hvis kursen på det underliggende aktiv kommer ned på eller ned under stop-loss-niveauet, bortfalder Instrumenterne, og hele eller en del af det investerede beløb går tabt. Stop-loss-niveauet og finansieringsniveauet justeres dagligt. Valutaudsving vil også have en indvirkning på Instrumenternes resultater.
- (b) Ved at investere i Instrumenterne påtager investor sig den risiko, at Udstederen ikke er i stand til at foretage betalinger i relation til værdipapirerne i overensstemmelse med deres vilkår. I tilfælde af Udstederens insolvens er der en risiko for, at investorerne kan tabe hele eller en del af deres investeringer. Instrumenterne er usikrede og ikke-efterstillede forpligtelser for Udstederen. De er indbyrdes sideordnede og som minimum sideordnede med alle Udstederens øvrige udestående, usikrede og ikke-efterstillede forpligtelser, nuværende såvel som fremtidige. Instrumenterne kan også være omfattet af bail-in-beføjelsen i tilfælde af afvikling af

Udstederen i henhold til direktiv 2014/59/EU, som implementeret i Finland, og kan nedskrives eller konverteres til andre værdipapirer (inklusive ordinære aktier), hvis afviklingsmyndigheden bestemmer, at dette er nødvendigt for at genoprette Udstederens levedygtighed.

- (c) Instrumenterne er frit omsættelige i henhold til deres vilkår, selvom Basisprospektet dog opsummerer visse juridiske restriktioner for udbud og salg af Instrumenter i visse jurisdiktioner.

Hvor vil værdipapirerne blive handlet?

Der er indgivet ansøgning om, at Instrumenterne optages til notering på Nasdaq First North Denmark og til handel på Nasdaq First North Denmark med virkning fra Udstedelsesdatoen.

Hvad er de vigtigste risici, der er specifikke for værdipapirerne?

Produktets kompleksitet - Afkaststrukturen for Instrumenterne er til tider kompleks og kan indeholde matematiske formler eller sammenhænge, som kan være svære for en investor at forstå og sammenligne med andre investeringsmuligheder. Særligt kan sammenhængen mellem afkast og risiko være svær at vurdere.

Gearingsrisici – Instrumenterne har en struktur, der betyder, at det underliggende aktivs resultater påvirker kursen på Instrumentet, hvilket kan medføre et tab eller en fortjeneste, som er større, end hvis investoren havde investeret direkte i det underliggende aktiv. Man udtrykker det normalt på den måde, at Instrumenterne har en gearingseffekt i forhold til at investere i det underliggende aktiv, dvs. at en ændring i kursen (i op- eller nedadgående retning) på det underliggende aktiv medfører en procentuel større ændring i Instrumenternes værdi. Der er derfor en større risiko forbundet med at investere i Instrumenterne end ved at investere i det underliggende aktiv. Sådanne Instrumenter kan blive værdiløse.

Der er måske ikke noget aktivt marked for handel med Instrumenterne - Instrumenterne er nye værdipapirer, som måske ikke sælges i større omfang, og/eller som kan være unoterede, og som måske ikke har noget aktivt marked for handel med dem (heller ikke selvom de evt. er noterede). Hvis der ikke er noget aktivt marked for handel med Instrumenterne, kan det betyde, at de ikke er særligt likvide, hvorfor investoren kan være nødt til at beholde dem indtil indfrielsestidspunktet.

Resultaterne af de underliggende aktiver - I henhold til Instrumenternes vilkår er indehaverne berettiget til afkast og udbetaling af et eventuelt afregningsbeløb afhængig af de resultater, der opnås af et eller flere underliggende aktiver, samt af den gældende afkaststruktur. Instrumenternes resultater påvirkes af værdien af de underliggende aktiver på bestemte tidspunkter i Instrumenternes løbetid, graden af kursudsving på de underliggende aktiver, forventningerne til den fremtidige volatilitet, markedsrenten og de forventede udbytter af de underliggende aktiver. I nogle tilfælde kan investoren tabe hele det investerede beløb.

Automatisk førtidig indfrielse - Instrumenterne vil kunne blive indfriet automatisk inden det planlagte udløbstidspunkt, hvis visse betingelser er opfyldt (typisk benævnt et "*knock*"). Under nogle omstændigheder kan dette resultere i tab af alle eller en del af investorens fremtidige kupon- eller rentebetalinger vedrørende Instrumenterne. Da visse omkostninger og udgifter fratrækkes udstedelseskursen, kan en førtidig indfrielse af Instrumenterne også resultere i forholdsvis højere udgifter.

Risici i relation til markedsforstyrrelser og ekstraordinære hændelser - Underliggende aktiver kan blive påvirket af forstyrrelser på deres normale handelsmarkeder eller af ekstraordinære hændelser som f.eks. afnotering, nationalisering, konkurs, likvidation eller andre forhold, der udvander de pågældende underliggende aktivers værdi. For alle Instrumenter kan der forekomme hændelser som f.eks. ændringer i lovgivningen eller stigninger i omkostningerne til risikostyring. I sådanne tilfælde kan Udstederen vælge at foretage ændringer i sammensætningen af aktiverne og i beregningen af Instrumenternes afkast eller værdi eller at erstatte ét underliggende aktiv med et andet, hvis Udstederen anser dette for at være nødvendigt.

Risici i relation til det underliggende aktiv – afkastet og værdien af Instrumenterne vil afhænge af udviklingen i

det Underliggende Aktiv. Da udviklingen af Instrumenterne er koblet til udviklingen i det Underliggende Aktiv, risikerer investoren at tabe hele det investerede beløb. Værdien af et Instrument kan, ud over ændringer i prisen på det Underliggende Aktiv, blive påvirket af intensiteten af prisændringer i det Underliggende Aktiv (almindeligvis kaldet volatilitet), forventninger vedrørende den fremtidige volatilitet, markedsrenter og forventede dividender eller andet afkast på det Underliggende Aktiv. Investorer bør være opmærksomme på, at markedsprisen på Instrumenterne kan være volatil som følge af udviklingen i det Underliggende Aktiv, og det beløb, som investoren modtager i henhold til Instrumentet, kan være mindre end det beløb, som oprindeligt blev betalt for Instrumentet, eller ligefrem nul. Ændringer i prisen på det Underliggende Aktiv er ikke nødvendigvis direkte korrelerede med prisen på Instrumentet, og en lille ændring i værdien af det Underliggende Aktiv kan medføre en væsentlig ændring i værdien af Instrumentet. Udstederen har ikke kontrol over prisen eller sammensætningen af de Underliggende Aktiver. En investor i Instrumentet har ikke de rettigheder, som en direkte ejer af det Underliggende Aktiv har, f.eks. retten til at modtage dividende eller andre betalinger i forbindelse med at være indehaver af det Underliggende Aktiv. Hvis de(t) Underliggende Aktiv(er) er denomineret i en anden valuta end den, som Instrumenterne er denomineret i, er investorer i Instrumenterne også eksponeret mod valutakursrisiko og kan lide væsentlige tab, selv hvis værdien af det Underliggende Aktiv er uændret målt i den valuta, som det er denomineret i, eller har udviklet sig positivt. Historiske valutakurser er ikke nødvendigvis en indikation på fremtidige valutakurser.

Øvrige risici i forbindelse med Instrumenterne kan bl.a. relatere sig til renteændringer, valutakursændringer, hvorvidt Udstederen er berettiget til at indfri Instrumenterne førtidigt, de finansielle instrumenters kompleksitet, udsving i relevante indekser, andre underliggende aktiver eller det finansielle marked, samt hvorvidt indfrielse afhænger af andre faktorer end Udstederens kreditværdighed.
