Neither the Final Terms nor the Base Prospectus constitutes an offer to sell or the solicitation of an offer to buy securities in the United States or in any other jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration, exemption from registration or qualification under the securities law of any such jurisdiction.

The securities described in the Final Terms and the Base Prospectus have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (the "Securities Act") and may not be offered or sold directly or indirectly within the United States or to, or for the account or benefit of, U.S. persons or to persons within the United States of America (as such terms are defined in Regulation S under the Securities Act ("Regulation S")). What are the Key Risks Specific to the Issuer?

Negative economic developments and conditions in the markets in which the Nordea Group operates can adversely affect the Nordea Group's business and results of operations: The Nordea Group's performance is significantly influenced by the general economic conditions in the Nordic markets (Denmark, Finland, Norway and Sweden). Development of the economic conditions in other markets where the Nordea Group currently operates can also affect the Nordea Group's performance. Economic developments have affected and may continue to affect the Nordea Group's business in a number of ways, including, among others, the income, wealth, liquidity, business and/or financial condition of the Nordea Group's customers, which, in turn, could further reduce the Nordea Group's credit quality and demand for the Nordea Group's financial products and services.

Deterioration in counterparties' credit quality may affect the Nordea Group's financial performance: Risks arising from changes in credit quality and the recoverability of loans and amounts due from counterparties are inherent in a wide range of the Nordea Group's businesses. The Nordea Group makes provisions for loan losses in accordance with IFRS. However, the provisions made are based on available information, estimates and assumptions and are subject to uncertainty, and there can be no assurances that the provisions will be sufficient to cover the amount of loan losses as they occur. Adverse changes in the credit quality of the Nordea Group's borrowers and counterparties or a decrease in collateral values, are likely to affect the recoverability and value of the Nordea Group's assets and require an increase in the Nordea Group's individual provisions and potentially in collective provisions for impaired loans, which in turn would adversely affect the Nordea Group's financial performance. In particular, the Nordea Group's exposure to corporate customers is subject to adverse changes in credit quality should the economic environment in the Nordea Group's markets deteriorate.

The Nordea Group is exposed to market price risk: The Nordea Group's customer-driven trading operations and its treasury operations (where the Nordea Group holds investment and liquidity portfolios for its own account) are the key contributors to market price risk in the Nordea Group. To the extent volatile market conditions persist or recur, the fair value of the Nordea Group's bond, derivative and structured credit portfolios, as well as other classes, could fall more than estimated, and therefore cause the Nordea Group to record write-downs. In addition, because the Nordea Group's trading and investment income depends to a great extent on the performance of financial markets, volatile market conditions could result in a significant decline in the Nordea Group's trading and investment income, or result in a trading loss, which, in turn, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations.

The Nordea Group is subject to extensive regulation that is subject to change: Companies active in the financial services industry, including the Nordea Group, operate under an extensive regulatory regime. The Nordea Group is subject to laws and regulations, administrative actions and policies as well as related oversight from the local regulators in each of the jurisdictions in which it has operations. The Nordea Group is also under the direct supervision and subject to the regulations of the European Central Bank, as a result of the size of its assets. Regulatory developments or any other requirements, restrictions, limitations on the operations of financial institutions and costs involved, or unexpected requirements under, or uncertainty with respect to, the regulatory framework to be applied to the Nordea Group, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations.

Liquidity risk is inherent in the Nordea Group's operations: Liquidity risk is the risk that the Nordea Group will be unable to meet its obligations as they fall due or meet its liquidity commitments only at an increased cost. A substantial portion of the Nordea Group's liquidity and funding requirements is met through reliance on customer deposits, as well as ongoing access to wholesale funding markets, including issuance of long-term debt market instruments, such as covered bonds. The volume of these funding sources, in particular long-term funding, may be constrained during periods of liquidity stress. Turbulence in the global financial markets and economy may adversely affect the Nordea Group's liquidity and the

willingness of certain counterparties and customers to do business with the Nordea Group, which may result in a material adverse effect on the Nordea Group's business and results of operations.

- (a) **Bear Certificate:** the return of the Instruments depends on the performance of the underlying asset. The price of the Instruments will be adjusted for dividends in the underlying asset. The performance of the Instruments will be the reversed daily performance of the underlying asset multiplied by the predefined leverage. This means that the price of the Instruments increases when the price of the underlying asset decreases, and decreases when the price of the underlying asset increases. Currency fluctuations will also affect the performance of the investment. If the positive performance, on one single day, reaches or is above the stop loss buffer, the Instruments will terminate and part of or all your amount invested will be lost.. Or, if a stop loss buffer is specified, then if the positive performance, on one single day, multiplied by the leverage is 100 or higher, the Instruments will terminate and all amount invested will be lost.
- (b) By investing in the Instruments, an investor will be assuming the risk that the Issuer will not be able to make payments on the securities in accordance with their terms. On an insolvency of the Issuer, there is a risk that the investors may lose some or all of their investment. The Instruments constitute unsecured and unsubordinated obligations of the Issuer and rank *pari passu* without any preference among themselves and at least *pari passu* with all other outstanding unsecured and unsubordinated obligations of the Issuer, present and future. The Instruments could also be subject to the bail-in power in the event of a resolution of the Issuer under directive 2014/59/EU, as implemented in Finland, and may be written down or converted into other securities (including ordinary shares) if the resolution authority determines that this is necessary in order to restore the viability of the Issuer.
- (c) The Instruments are freely transferable by their terms, although the Base Prospectus summarises certain legal restriction on the offers and sales of Instruments in certain jurisdictions.

Where will the Securities be Traded?

Application has been made for the Instruments to be admitted to listing on Nasdaq First North Denmark and to trading on Nasdaq First North Denmark effective as of the Issue Date.

What are the Key Risks that are Specific to the Securities?

Complexity of the product – The yield structure for the Instruments is sometimes complex and may contain mathematical formulae or relationships which, for an investor, may be difficult to understand and compare with other investment alternatives. It should be noted that the relationship between yield and risk may be difficult to assess.

Leverage Risks – due to the structure of the Instruments, the performance of the underlying asset will affect the price of the Instrument and may lead to larger profits or losses on invested capital than if the investment had been made directly in the underlying asset. This is normally expressed by saying that the Instruments have a leverage effect compared with an investment in the underlying asset, i.e. a change in price (both upwards and downwards) of the underlying asset results, in percentage terms, in a greater change in the value of the Instruments. Consequently, the risk associated with an investment in such Instruments is greater than with an investment in the underlying asset. Such Instruments may become worthless.

There may be no active trading market for the Instruments - The Instruments will be new securities which may not be widely distributed and/or may be unlisted and, even if listed, may not have an active trading market. The lack of an active trading market may result in reduced liquidity for the Instruments, with the result that the investor may have to hold such Instruments until they are redeemed. Holders of Instruments should be aware that the secondary market for the Instruments and instruments of this kind may be illiquid due to, among other things, the disruptions and volatility in the global financial markets that have continued through recent years. Holders of Instruments should also be aware that inflation could have an adverse effect on the value of the relevant Instruments (including, without limitation, capital protected Instruments), including where the return on the Instruments is below the level of the relevant inflation rate(s).

Performance of the underlying assets – under the terms of the Instruments, the holders are entitled to yield and payment of any applicable settlement amount, depending on the performance of one or more underlying assets and the applicable yield structure. The performance of the Instruments is affected by the value of the underlying assets at specific points in time during the term of the Instruments, the intensity of fluctuations in the prices of the underlying assets, expectations regarding future volatility, market interest rates, and expected dividends on the underlying assets. In some circumstances the investor may lose all of their invested amount.

Automatic early redemption – The Instruments may be redeemed automatically if certain conditions are met, typically referred to as a "knock". In some circumstances, this may result in a loss of part, or all, an investor's future coupon or interest payments in respect of the Instruments. Because certain costs and expenses are deducted from the issue price, an early redemption of the Instruments may also result in proportionately higher expenses.

Risks relating to market disruption and extraordinary events - underlying assets may be affected by disruption to their normal trading markets, or extraordinary events such as delisting, nationalisation, bankruptcy, liquidation or dilutive events affecting the relevant underlying asset. For all Instruments, events such as changes in the law or increased costs for risk management may arise. If so, the Issuer may, at its sole discretion, make any adjustments in the composition of the assets and the calculation of the yield or value of Instruments or replace one underlying asset with another underlying asset, as the Issuer deems necessary.

Risks relating to the underlying asset – the return on the Instruments will depend on the performance of the Underlying Assets. Investors should be aware that the market price of the Instruments may be volatile due to the performance of the Underlying Assets, and the amount payable upon exercise or maturity may be less than the original amount paid for the Instruments, or even zero. Changes in the price of the Underlying Asset may not be directly correlated with the price of the Instruments and a small movement in the value of

the Underlying Asset may result in a significant change in the value of the Instruments.

Risks relating to short exposures – a "long" exposure means that the performance of the Instrument will appreciate when the value of the underlying asset increases. Conversely Instruments that have a "short" exposure, including Bear Certificates, will decline in value where the value of the underlying asset increases. A rise in the value of the underlying asset could therefore result in the investor losing some or all of the invested capital.

Other risks associated with Instruments may relate, inter alia, to changes in interest rates, changes in exchange rates, whether the Issuer is entitled to redeem the Instruments prematurely, the complexity of the financial instruments, fluctuations in relevant indices, other underlying assets or the financial market, and whether repayment is dependent on circumstances other than the credit-worthiness of the Issuer.

Hvad er de vigtigste risici, der er specifikke for Udstederen?

Negative økonomiske udviklingstendenser og forhold på de markeder, hvor Nordea-koncernen opererer, kan have en negativ indvirkning på Nordea-koncernens virksomhed og driftsresultater: Nordea-koncernens resultater påvirkes i væsentlig grad af de generelle økonomiske forhold i de nordiske markeder (Danmark, Finland, Norge og Sverige). Udviklingen i de økonomiske forhold på andre markeder, hvor Nordea-koncernen p.t. driver virksomhed, kan ligeledes påvirke Nordea-koncernens resultater. Økonomiske udviklingstendenser har påvirket og vil fortsat kunne påvirke Nordea-koncernens virksomhed på forskellige måder, herunder kundernes indkomst, formue, likviditet, virksomhed og/eller økonomiske situation, hvilket kan forringe Nordea-koncernens bonitet og efterspørgslen efter Nordea-koncernens finansielle produkter og ydelser.

Forringelse af modparterers bonitet kan påvirke Nordea-koncernens økonomiske resultater: En stor del af Nordea-koncernens virksomhed er eksponeret over for risici, der måtte opstå som følge af ændringer i bonitet samt ændringer i muligheden for at inddrive lån og forfaldne beløb fra modparterne. Nordea-koncernen foretager hensættelser til imødegåelse af tab på lån i overensstemmelse med IFRS. De foretagne hensættelser er dog baseret på tilgængelige oplysninger, estimater og antagelser og er behæftet med usikkerhed, og der kan ikke være nogen garanti for, at hensættelserne er tilstrækkelige til at dække de faktiske tab på lån. Hvis der sker ændringer i boniteten hos Nordea-koncernens låntagere og modparter, eller hvis værdien af den stillede sikkerhed falder, kan dette påvirke både muligheden for at inddrive Nordea-koncernens aktiver og værdien af disse og kræve en øgning i Nordea-koncernens individuelle hensættelser og potentielt i modelbaserede hensættelser ved værdiforringede lån, hvilket igen vil have en negativ indvirkning på Nordea-koncernens økonomiske resultater. Nordea-koncernens eksponering over for erhvervskunder bliver særligt påvirket af negative ændringer i boniteten, såfremt der sker en forværring af den økonomiske situation på Nordea-koncernens markeder.

Nordea-koncernen er eksponeret over for markedskursrisici: Nordea-koncernens kundebaseerede handelsaktiviteter og dens likviditetsoperationer (hvor Nordea-koncernen besidder investerings- og likviditetsporteføljer for egen regning) er de væsentligste årsager til markedskursrisikoen i Nordea-koncernen. I det omfang markedet vedvarende eller ofte er volatilt, vil dagsværdien af Nordea-koncernens porteføljer af obligationer, derivater og strukturerede lån samt også andre kategorier kunne falde mere end estimeret og dermed medvirke til, at Nordea-koncernen må foretage nedskrivninger. Da Nordea-koncernens handels- og investeringsindtægter i vidt omfang afhænger af resultaterne på finansmarkederne, kan volatile markedsforhold derudover medføre en betydelig nedgang i Nordea-koncernens handels- og investeringsindtægter eller resultere i et handelstab, der igen kan have en væsentlig negativ indvirkning på Nordea-koncernens virksomhed, økonomiske situation og driftsresultat.

Nordea-koncernen er underlagt betydelig regulering, der vil kunne ændre sig: Selskaber, som driver virksomhed inden for den finansielle sektor, herunder Nordea-koncernen, er underlagt betydelig regulering. Nordea-koncernen er omfattet af love og bestemmelser, administrative processer og politikker samt myndighedstilsyn i hver af de jurisdiktioner, hvori koncernen driver virksomhed. Nordea-koncernen er desuden på grund af størrelsen af sine aktiver under direkte tilsyn af Den Europæiske Centralbank og er underlagt dennes regulering. Reguleringsmæssige ændringer eller andre krav til, restriktioner for eller begrænsninger i driften af finansielle institutioner og de hermed forbundne omkostninger eller uventede krav eller usikkerhed i forbindelse med de lovgivningsmæssige rammer for Nordea-koncernens virksomhed kan have en væsentlig negativ indvirkning på Nordea-koncernens virksomhed, økonomiske situation og driftsresultat.

Nordea-koncernens virksomhedsaktiviteter er uløseligt forbundet med en likviditetsrisiko. Likviditetsrisiko betyder risikoen for, at Nordea-koncernen ikke er i stand til at opfylde sine forpligtelser, efterhånden som de forfalder, eller kun vil kunne overholde sine likviditetsforpligtelser med forøgede omkostninger. En væsentlig

del af Nordea-koncernens likviditets- og kapitalkrav opfyldes gennem kundeindlån samt løbende adgang til kapitalmarkeder, herunder udstedelse af langfristede gældsinstrumenter som f.eks. særligt dækkede obligationer. Omfanget af disse kapitalkilder, især langsigtet kapital, kan være begrænset i perioder med likviditetspres. Turbulens på de globale finansielle markeder og den globale økonomi kan have en negativ indvirkning på Nordea-koncernens likviditet og på viljen hos visse modparter og kunder til at samarbejde med Nordea-koncernen, hvilket kan medføre en væsentlig negativ indvirkning på Nordea-koncernens virksomhed og driftsresultat.

- (a) **Bear Certificate:** Instrumenternes afkast afhænger af det underliggende aktivs resultater. Kursen på Instrumenterne vil blive reguleret for udbytte i det underliggende aktiv. Instrumenternes resultater vil være det underliggende aktivs tilbageførte daglige resultater multipliceret med den foruddefinerede gearing. Dette betyder, at kursen på Instrumenterne stiger, når kursen på det underliggende aktiv falder, og den falder, når kursen på det underliggende aktiv stiger. Valutaudsving vil også have en indvirkning på investeringens resultater. Hvis investeringens positive resultater udtrykt i procent - på en enkelt dag - multipliceret med gearingen giver 100 eller mere, bortfalder Instrumenterne, og hele det investerede beløb går tabt. Eller, hvis en stop loss-buffer er gældende, og hvis den positive resultater udtrykt i procent - på en enkelt dag - multipliceret med gearingen er lig eller større end stop loss-bufferen, bortfalder Instrumenterne, og hele eller dele af det investerede beløb går tabt.

- (b) Ved at investere i Instrumenterne påtager investor sig den risiko, at Udstederen ikke er i stand til at foretage betalinger i relation til værdipapirerne i overensstemmelse med deres vilkår. I tilfælde af Udstederens insolvens er der en risiko for, at investorerne kan tabe hele eller en del af deres investeringer. Instrumenterne er usikrede og ikke-efterstillede forpligtelser for Udstederen. De er indbyrdes sideordnede og som minimum sideordnede med alle Udstederens øvrige udestående, usikrede og ikke-efterstillede forpligtelser, nuværende såvel som fremtidige. Instrumenterne kan også være omfattet af bail-in-beføjelsen i tilfælde af afvikling af Udstederen i henhold til direktiv 2014/59/EU, som implementeret i Finland, og kan nedskrives eller konverteres til andre værdipapirer (inklusive ordinære aktier), hvis afviklingsmyndigheden bestemmer, at dette er nødvendigt for at genoprette Udstederens levedygtighed.
- (c) Instrumenterne er frit omsættelige i henhold til deres vilkår, selvom Basisprospektet dog opsummerer visse juridiske restriktioner for udbud og salg af Instrumenter i visse jurisdiktioner.

Hvor vil værdipapirerne blive handlet?

Der er indgivet ansøgning om, at Instrumenterne optages til notering på Nasdaq First North Denmark og til handel på Nasdaq First North Denmark med virkning fra Udstedelsesdatoen.

Hvad er de vigtigste risici, der er specifikke for værdipapirerne?

Produktets kompleksitet - Afkaststrukturen for Instrumenterne er til tider kompleks og kan indeholde matematiske formler eller sammenhænge, som kan være svære for en investor at forstå og sammenligne med andre investeringsmuligheder. Særligt kan sammenhængen mellem afkast og risiko være svær at vurdere.

Gearingsrisici – Instrumenterne har en struktur, der betyder, at det underliggende aktivs resultater påvirker kursen på Instrumentet, hvilket kan medføre et tab eller en fortjeneste, som er større, end hvis investoren havde investeret direkte i det underliggende aktiv. Man udtrykker det normalt på den måde, at Instrumenterne har en gearingseffekt i forhold til at investere i det underliggende aktiv, dvs. at en ændring i kursen (i op- eller nedadgående retning) på det underliggende aktiv medfører en procentuel større ændring i Instrumenternes værdi. Der er derfor en større risiko forbundet med at investere i Instrumenterne end ved at investere i det underliggende aktiv. Sådanne Instrumenter kan blive værdiløse.

Der er måske ikke noget aktivt marked for handel med Instrumenterne - Instrumenterne er nye værdipapirer, som måske ikke sælges i større omfang, og/eller som kan være unoterede, og som måske ikke har noget aktivt marked for handel med dem (heller ikke selvom de evt. er noterede). Hvis der ikke er noget aktivt marked for handel med Instrumenterne, kan det betyde, at de ikke er særligt likvide, hvorfor investoren kan være nødt til at beholde dem indtil indfrielsestidspunktet. Investorerne bør være opmærksomme på, at det sekundære marked for Instrumenterne eller instrumenter af denne type kan være illikvidt som følge af, blandt andet, forstyrrelser og volatilitet på de globale finansielle markeder, som er fortsat gennem de seneste år. Investorerne bør også være opmærksomme på, at inflation kan have en negativ påvirkning af værdien af de relevante Instrumenter (herunder, men ikke kun, hovedstolsbeskyttede Instrumenter), herunder hvor afkastet på Instrumenterne er under niveauet på de(n) relevante inflationsrate(r).

Resultaterne af de underliggende aktiver - I henhold til Instrumenternes vilkår er indehaverne berettiget til afkast og udbetaling af et eventuelt afregningsbeløb afhængig af de resultater, der opnås af et eller flere underliggende aktiver, samt af den gældende afkaststruktur. Instrumenternes resultater påvirkes af værdien af de underliggende aktiver på bestemte tidspunkter i Instrumenternes løbetid, graden af kursudsving på de underliggende aktiver, forventningerne til den fremtidige volatilitet, markedsrenten og de forventede udbytter af de underliggende aktiver. I nogle tilfælde kan investoren tabe hele det investerede beløb.

Automatisk førtidig indfrielse - Instrumenterne vil kunne blive indfriet automatisk inden det planlagte udløbstidspunkt, hvis visse betingelser er opfyldt (typisk benævnt et "knock"). Under nogle omstændigheder kan dette resultere i tab af alle eller en del af investorens fremtidige kupon- eller rentebetalinger vedrørende

Instrumenterne. Da visse omkostninger og udgifter fratrækkes udstedelseskursen, kan en førtidig indfrielse af Instrumenterne også resultere i forholdsvis højere udgifter.

Valutaudsving og valutakurser som underliggende aktiver - Hvis det underliggende aktiv er en valutakurs eller er noteret i en anden valuta end investorens valuta, kan valutaudsving påvirke Instrumenternes afkast. Valutakurserne kan blive påvirket af komplekse politiske og økonomiske faktorer, herunder den relative inflationstakt, betalingsbalancen mellem landene, størrelsen af landenes budgetoverskud eller -underskud samt den penge-, skatte- og/eller handelspolitik, som landene med de pågældende valutaer fører. Valutaudsving kan også på kompleks vis påvirke værdien af eller niveauet for de underliggende aktiver. Hvis sådanne valutaudsving får værdien af eller niveauet for de underliggende aktiver til at variere, kan værdien af eller niveauet for Instrumenterne falde. Hvis værdien af eller niveauet for et eller flere underliggende aktiver er opgjort i en anden valuta end den valuta, som Instrumentet er udstedt i, kan investorerne være eksponeret over for en øget valutarisiko. Tidligere valutakurser kan ikke nødvendigvis bruges til at indikere fremtidige valutakurser

Risici i relation til markedsforstyrrelser og ekstraordinære hændelser - Underliggende aktiver kan blive påvirket af forstyrrelser på deres normale handelsmarkeder eller af ekstraordinære hændelser som f.eks. afnotering, nationalisering, konkurs, likvidation eller andre forhold, der udvander de pågældende underliggende aktivers værdi. For alle Instrumenter kan der forekomme hændelser som f.eks. ændringer i lovgivningen eller stigninger i omkostningerne til risikostyring. I sådanne tilfælde kan Udstederen vælge at foretage ændringer i sammensætningen af aktiverne og i beregningen af Instrumenternes afkast eller værdi eller at erstatte ét underliggende aktiv med et andet, hvis Udstederen anser dette for at være nødvendigt.

Risici i relation til de underliggende aktiver – afkastet på Instrumenterne vil afhænge af udviklingen i de Underliggende Aktiver. Investorer bør være opmærksomme på, at markedsprisen på Instrumenterne kan være volatil grundet udviklingen i de Underliggende Aktiver, og det beløb, der udbetales ved førtidsindfrielse eller udløb kan være mindre end det beløb, der oprindeligt blev betalt for Instrumenterne, eller ligefrem nul. Ændringer i prisen på det Underliggende Aktiv er ikke nødvendigvis direkte korrelerede med prisen på Instrumenterne, og en lille ændring i værdien af det Underliggende Aktiv kan medføre en væsentlig ændring i værdien af Instrumentet.

Risici som følge af kort eksponering - "lang" eksponering betyder, at Instrumentets resultater forøges, når værdien af det underliggende aktiv stiger. Omvendt vil Instrumenter, der har en "kort" eksponering, inklusive Bear Certificates, falde i værdi, når værdien af det underliggende aktiv stiger. En stigning i værdien af det underliggende aktiv kan derfor medføre, at investoren taber hele eller en del af den investerede kapital.

Øvrige risici i forbindelse med Instrumenterne kan bl.a. relatere sig til renteændringer, valutakursændringer, hvorvidt Udstederen er berettiget til at indfri Instrumenterne førtidigt, de finansielle instrumenters kompleksitet, udsving i relevante indekser, andre underliggende aktiver eller det finansielle marked, samt hvorvidt indfrielse afhænger af andre faktorer end Udstederens kreditværdighed.

4. Nøgleoplysninger om udbuddet af værdipapirer til offentligheden og/eller optagelsen til handel på et reguleret marked

På hvilke betingelser og i henhold til hvilken tidsplan kan jeg investere i dette værdipapir?

- (a) Et udbud af Instrumenterne til offentligheden vil finde sted i Danmark fra og med Udstedelsesdatoen til og med Udløbsdatoen ("**Udbudsperioden**"). Udstederen har accepteret, at Instrumenterne gøres tilgængelige på Nordnets online-handelsplatform..

Instrumenterne udstedes og beholdes i første omgang af Udstederen for egen regning, således at de til enhver tid vil kunne videresælges til potentielle investorer. Instrumenterne udbydes til salg på den relevante fondsbørs til den til enhver tid gældende officielle noterede kurs på fondsbørsen.

- (b) Der er indgivet ansøgning om, at Instrumenterne optages til handel på Nasdaq First North Denmark med virkning fra Udstedelsesdatoen.

- (c) Der vil ikke af Udstederen blive opkrævet udgifter hos investorerne i Instrumenterne.

Udbyderen af Instrumenterne og den person, der anmoder om optagelse af Instrumenterne til handel, er Udstederen.

Instrumenterne kan også blive udbudt af Nordnet, som Udstederen har udnævnt som Autoriserede Udbydere af Instrumenterne.

Hvorfor udarbejdes dette prospektresumé?

- (a) Udbuddet fremsættes med det formål at skaffe kapital til Udstederen og tilbyde investorer et afkast, der er knyttet til resultaterne af de underliggende aktiver. Nettoprovenuet fra udstedelsen af Instrumenterne vil blive anvendt som led i Udstederens og Nordea-koncernens almindelige bankvirksomhed og til andre erhvervsrelaterede formål.
- (b) Udbuddet af Instrumenterne er ikke omfattet af en tegningsgaranti.
- (c) Autoriserede Udbydere og andre tredjemænd, der fungerer som distributører, kan modtage honorar i forbindelse med udstedelse af Instrumenterne. I forbindelse med udstedelsen og udbuddet af Instrumenterne vil Udstederen gøre brug af marketing- og kundesupporttjenesterne hos Nordnet Bank AB ("**Nordnet**"). Udstederen betaler Nordnet for disse tjenester. Derudover har Udstederen indgået aftale med Nordnet om, at Nordnet gør Instrumenterne tilgængelige på Nordnets online-handelsplatform. Nordnet modtager betaling for dette i henhold til aftalen. Med undtagelse af førnævnte er der Udsteder bekendt ikke nogen af de personer, der er involveret i udstedelsen af Instrumenterne, der har interesser, som er af væsentlig betydning for udbuddet.
