\* Nordea's policy has been to amortise resolution fees linearly over the year. Starting from 1 January 2019, Nordea has recognised resolution fees at the beginning of the year when the legal obligation to pay arises and presents the related expenses as "other expenses". The change mainly reflects the change in the structure of the resolution fees following the re-domiciliation of the parent company of the Nordea Group from Sweden to Finland. The comparative figures for the year ending 31 December 2018 have been restated accordingly to enhance comparability. The figures marked with one asterisk (\*) have been restated to reflect the changed recognition and presentation of resolution fees.

\*\* Changes have been made to the presentation of fair value adjustments to the margin component of loans in "hold" portfolios mandatorily held at fair value. The comparative figures marked with two asterisks (\*\*) have been restated accordingly. Please refer to Note 1 to Nordea's fourth quarter and full year results for 2020 for further information.

#### *What are the Key Risks Specific to the Issuer?*

**The global coronavirus outbreak, which has negatively impacted the economies exposed to the outbreak, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations and adversely affect the Nordea Group's ability to access capital and liquidity:** The outbreak of COVID-19 (also commonly referred to as the "coronavirus") has spread rapidly globally in recent months and disrupted various markets and resulted in severe uncertainty about the development of the economies affected by the outbreak both in Europe and elsewhere. The majority of the Nordea Group's operations are concentrated in the Nordic countries that have been, and are expected to continue to be, exposed to the coronavirus outbreak in a similar manner as a number of other European countries. The Nordea Group is affected by the coronavirus outbreak through its direct and indirect impact on the customers, counterparties, employees and other stakeholders of the Nordea Group, both in the Nordic countries and elsewhere, as a result of, among others, public health measures, such as business closings and restrictions on travel and gatherings. Any of the foregoing, and any future adverse consequences related to the coronavirus outbreak not yet known, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations and adversely affect the Nordea Group's ability to access capital and liquidity on financial terms acceptable to the Nordea Group.

**Negative economic developments and conditions in the markets in which the Nordea Group operates can adversely affect the Nordea Group's business and results of operations:** Nordea Group's performance is significantly influenced by the general economic conditions in the Nordic markets (Denmark, Finland, Norway and Sweden). Development of the economic conditions in other markets where the Nordea Group currently operates can also affect the Nordea Group's performance. Adverse economic developments have affected and may continue to affect the Nordea Group's business in a number of ways, including, among others, the income, wealth, liquidity, business and/or financial condition of the Nordea Group's customers, which, in turn, could further reduce the Nordea Group's credit quality and demand for the Nordea Group's financial products and service. For example, the coronavirus outbreak and the

preventive measures implemented in the Nordic countries and elsewhere to contain its spread could have an adverse effect on the Group's customers, which, in turn, could result in decreased credit quality and increased provisioning levels.

**The Nordea Group is exposed to market price risk:** The Nordea Group's customer-driven trading operations and its treasury operations (where the Nordea Group holds investment and liquidity portfolios for its own account) are the key contributors to market price risk in the Nordea Group. To the extent volatile market conditions persist or recur, the fair value of the Nordea Group's bond, derivative and structured credit portfolios, as well as other classes, could fall more than estimated, and therefore cause the Nordea Group to record write-downs. In addition, because the Nordea Group's trading and investment income depends to a great extent on the performance of financial markets, volatile market conditions could result in a significant decline in the Nordea Group's trading and investment income, or result in a trading loss, which, in turn, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations.

**The Nordea Group is subject to extensive regulation that is subject to change:** Companies active in the financial services industry, including the Nordea Group, operate under an extensive regulatory regime. The Nordea Group is subject to laws and regulations, administrative actions and policies as well as related oversight from the local regulators in each of the jurisdictions in which it has operations. The Nordea Group is also under the direct supervision and subject to the regulations of the European Central Bank, as a result of the size of its assets. Regulatory developments or any other requirements, restrictions, limitations on the operations of financial institutions and costs involved, or unexpected requirements under, or uncertainty with respect to, the regulatory framework to be applied to the Nordea Group, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations.

**Liquidity risk is inherent in the Nordea Group's operations.** Liquidity risk is the risk that the Nordea Group will be unable to meet its obligations as they fall due or meet its liquidity commitments only at an increased cost. A substantial portion of the Nordea Group's liquidity and funding requirements is met through reliance on customer deposits, as well as ongoing access to wholesale funding markets, including issuance of long-term debt market instruments, such as covered bonds. The volume of these funding sources, in particular long-term funding, may be constrained during periods of liquidity stress. Turbulence in the global financial markets and economy may adversely affect the Nordea Group's liquidity and the willingness of certain counterparties and customers to do business with the Nordea Group, which may result in a material adverse effect on the Nordea Group's business and results of operations.

- (a) **Bear Certificate:** the return of the Instruments depends on the performance of the underlying asset. The price of the Instruments will be adjusted for dividends in the underlying asset. The performance of the Instruments will be the reversed daily performance of the underlying asset multiplied by the predefined leverage. This means that the price of the Instruments increases when the price of the underlying asset decreases, and decreases when the price of the underlying asset increases. Currency fluctuations will also affect the performance of the investment. If the positive performance, on one single day, multiplied by the leverage is 100 or higher, the Instruments will terminate and all amount invested will be lost.
- (b) By investing in the Instruments, an investor will be assuming the risk that the Issuer will not be able to make payments on the securities in accordance with their terms. On an insolvency of the Issuer, there is a risk that the investors may lose some or all of their investment. The Instruments constitute unsecured and unsubordinated obligations of the Issuer and rank *pari passu* without any preference among themselves and at least *pari passu* with all other outstanding unsecured and unsubordinated obligations of the Issuer, present and future. The Instruments could also be subject to the bail-in power in the event of a resolution of the Issuer under directive 2014/59/EU, as implemented in Finland, and may be written down or converted into other securities (including ordinary shares) if the resolution authority determines that this is necessary in order to restore the viability of the Issuer.
- (c) The Instruments are freely transferable by their terms, although the Base Prospectus summarises certain legal restriction on the offers and sales of Instruments in certain jurisdictions.

*Where will the Securities be Traded?*

Application has been made for the Instruments to be admitted to listing on Nasdaq First North Sweden and to trading on Nasdaq First North Sweden effective as of the Issue Date.

*What are the Key Risks that are Specific to the Securities?*

**Complexity of the product** – The yield structure for the Instruments is sometimes complex and may contain mathematical formulae or relationships which, for an investor, may be difficult to understand and compare with other investment alternatives. It should be noted that the relationship between yield and risk may be difficult to assess.

**Leverage Risks** – due to the structure of the Instruments, the performance of the underlying asset will affect the price of the Instrument and may lead to larger profits or losses on invested capital than if the investment had been made directly in the underlying asset. This is normally expressed by saying that the Instruments have a leverage effect compared with an investment in the underlying asset, i.e. a change in price (both upwards and downwards) of the underlying asset results, in percentage terms, in a greater change in the value of the Instruments. Consequently, the risk associated with an investment in such Instruments is greater than with an investment in the underlying asset. Such Instruments may become worthless.

**There may be no active trading market for the Instruments** - The Instruments will be new securities which may not be widely distributed and/or may be unlisted and, even if listed, may not have an active trading market. The lack of an active trading market may result in reduced liquidity for the Instruments, with the result that the investor may have to hold such Instruments until they are redeemed.

**Performance of the underlying assets** – under the terms of the Instruments, the holders are entitled to yield and payment of any applicable settlement amount, depending on the performance of one or more underlying assets and the applicable yield structure. The performance of the Instruments is affected by the value of the underlying assets at specific points in time during the term of the Instruments, the intensity of fluctuations in the prices of the underlying assets, expectations regarding future volatility, market interest rates, and expected dividends on the underlying assets. In some circumstances the investor may lose all of their invested amount.

**Automatic early redemption** – The Instruments may be redeemed automatically if certain conditions are met, typically referred to as a "knock". In some circumstances, this may result in a loss of part, or all, an investor's future coupon or interest payments in respect of the Instruments. Because certain costs and expenses are deducted from the issue price, an early redemption of the Instruments may also result in proportionately higher expenses.

**Risks relating to market disruption and extraordinary events** - underlying assets may be affected by disruption to their normal trading markets, or extraordinary events such as delisting, nationalisation, bankruptcy, liquidation or dilutive events affecting the relevant underlying asset. For all Instruments, events such as changes in the law or increased costs for risk management may arise. If so, the Issuer may, at its sole discretion, make any adjustments in the composition of the assets and the calculation of the yield or value of Instruments or replace one underlying asset with another underlying asset, as the Issuer deems necessary.

**Shares as underlying assets** – Share-linked instruments are not sponsored or promoted by the issuer of the shares. Accordingly, the issuer of the shares has no obligation to take into account the interests of investors in the Instruments and thus the actions of such share issuer might negatively affect the market value of the Instruments. An investor in the Instruments is not entitled to receive any payments or other dividends to which a direct owner of the underlying shares would otherwise be entitled.

**Risks relating to short exposures** – a "long" exposure means that the performance of the Instrument will appreciate when the value of the underlying asset increases. Conversely Instruments that have a "short" exposure, including Bear Certificates, will decline in value where the value of the underlying asset increases. A rise in the value of the underlying asset could therefore result in the investor losing some or all of the invested capital.

Other risks associated with Instruments may relate, inter alia, to changes in interest rates, changes in exchange rates, whether the Issuer is entitled to redeem the Instruments prematurely, the complexity of the financial instruments, fluctuations in relevant indices, other underlying assets or the financial market, and whether repayment is dependent on circumstances other than the credit-worthiness of the Issuer.

\* Nordeas praksis har vært å avskrive bidrag til bankenes sikringsfond lineært over året. Fra og med 1. januar 2019 har Nordea bokført bidrag til bankenes sikringsfond ved begynnelsen av året når den lovfestede betalingsplikten oppstår og presenterer de relaterte kostnadene under «andre kostnader». Endringen gjenspeiler hovedsakelig endringen i strukturen i bidragene til bankenes sikringsfond etter at setet til Nordea-konsernets morselskap har blitt flyttet tilbake fra Sverige til Finland. De sammenlignbare tallene for året som sluttet 31. desember 2018, har blitt omarbeidet tilsvarende for å fremme sammenlignbarheten. Tallene merket med en stjerne (\*) har blitt omarbeidet for å reflektere den endrede bokføringen og føringen av bidrag til bankenes sikringsfond.

\*\*Det er gjort endringer til presentasjonen av "fair value" justeringer til marginkomponenten til lån i «hold»-porteføljen, som obligatorisk er holdt på "fair value". De sammenlignbare tallene er markert med to stjerner (\*\*) og er blitt endret i overensstemmelse med dette. For ytterligere informasjon se note 1 til Nordeas fjerde kvartalsregnskap og det samlede årsregnskapet for 2020.

*Hva er de viktigste risikoene som er spesifikke for Utstederen?*

**Det globale utbruddet av coronavirus, som har hatt en negativ påvirkning på økonomiene berørt av**

**utbruddet, kan ha en vesentlig negativ innvirkning på Nordea-konsernets virksomhet, økonomiske situasjon og driftsresultater og negativt påvirke Nordea-konsernets tilgang på kapital og likviditet:**

Utbruddet av COVID-19 (som også ofte omtales som «coronaviruset») har hurtig spredt seg globalt de seneste månedene og skapt uro på flere markeder og resultere i stor usikkerhet rundt utviklingen i de økonomiene som er berørt av utbruddet både i Europa og andre steder. Størstedelen av Nordea-konsernets forretninger er konsentrert i de nordiske landene som har vært, og som forventes å stadig være, berørt av utbruddet av coronavirus i samme grad som en rekke andre europeiske land. Nordea-konsernet påvirkes av utbruddet av coronavirus gjennom dets direkte og indirekte påvirkning på kunder, motparter, medarbeidere og andre interessenter i Nordea-konsernet, både i de nordiske landene og andre steder, som et resultat av, blant annet, offentlige tiltak til gagn for folkehelsen som stengning av butikker og begrensninger på reiseaktivitet og forsamlinger. Det foregående og enhver fremtidig negativ konsekvens av coronavirus, som fortsatt ikke er kjent, kan ha vesentlig negativ påvirkning på Nordea-konsernets virksomhet, økonomiske situasjon og driftsresultater og negativt påvirker Nordea-konsernets tilgang på kapital og likviditet på finansielle vilkår som er akseptable for Nordea-konsernet.

**Negativ økonomisk utvikling og negative forhold i markedene som Nordea-konsernet har virksomhet i, kan ha negativ virkning på Nordea-konsernets virksomhet og driftsresultater:**

Nordea-konsernets resultater påvirkes vesentlig av de generelle økonomiske forholdene i de nordiske markedene (Danmark, Finland, Norge og Sverige). Utviklingen i de økonomiske forholdene i andre markeder der Nordea-konsernet for tiden har virksomhet, kan også påvirke resultatene til Nordea-konsernet. Negativ økonomisk utvikling har påvirket og kan fortsette å påvirke Nordea-konsernets virksomhet på mange måter, inkludert blant annet inntekt, formue, likviditet, virksomhetsforhold og/eller finansiell stilling for Nordea-konsernets kunder, som igjen kan redusere Nordea-konsernets kredittverdighet og etterspørsel etter Nordea-konsernets produkter og tjenester. For eksempel, utbruddet av coronavirus og de preventive tiltak som er implementert i de nordiske landene og andre steder for å begrense spredningen av coronavirus kan ha en negativ påvirkning på Nordea-konsernets kunder, hvilket kan resultere i en lavere kreditt-rating og økede kapitalkrav.

**Nordea-konsernet er eksponert for markedspriserisiko:** Nordea-konsernets kundeorienterte handelsaktiviteter og dets treasuryaktiviteter (der Nordea-konsernet har investeringer og likviditetsporteføljer for egen regning) er de viktigste bidragsyterne til markedspriserisikoen i Nordea-konsernet. Dersom volatile markedsforhold vedvarer eller gjenoppstår, vil den virkelige verdien til Nordea-konsernets porteføljer for obligasjoner, derivater og strukturerte kreditter, samt andre investeringsklasser, kunne falle mer enn beregnet og således tvinge Nordea-konsernet til å foreta nedskrivninger. I tillegg, siden Nordea-konsernets handels- og investeringsinntekter i stor grad avhenger av utviklingen i finansmarkedene, kan volatile markedsforhold føre til en betydelig nedgang i Nordea-konsernets handels- og investeringsinntekter, eller resultere i tap på trading, som igjen kan ha en vesentlig negativ effekt på Nordea-konsernets virksomhet, finansielle stilling og driftsresultater.

**Nordea-konsernet er underlagt omfattende regulering som kan endre seg:** Virksomheten til selskaper som er aktive i bransjen for finansielle tjenester, inkludert Nordea-konsernet, er underlagt et omfattende regulatorisk regime. Nordea-konsernet er underlagt lover og forskrifter, administrative tiltak og retningslinjer, samt tilknyttet tilsyn fra lokale tilsynsmyndigheter i hver jurisdiksjon konsernet har virksomheter i. Som et resultat av størrelsen på sine aktiva er Nordea-konsernet også underlagt direkte tilsyn av og er gjenstand for forskriftene til Den europeiske sentralbanken. Regulatorisk utvikling eller alle andre krav, restriksjoner eller begrensninger av driften til finansinstitusjoner og tilknyttede kostnader, eller uventede krav under eller usikkerhet i sammenheng med det regulatoriske rammeverket som skal anvendes i Nordea-konsernet, kan ha en vesentlig negativ effekt på Nordea-konsernets virksomhet, finansielle stilling og driftsresultater.

**Likviditetsrisiko er iboende i Nordea-konsernets virksomheter.** Likviditetsrisiko er risikoen for at Nordea-konsernet ikke vil være i stand til å oppfylle sine forpliktelser etter hvert som de forfaller eller bare kan oppfylle sine likviditetsforpliktelser til økte kostnader. En vesentlig del av Nordea-konsernets likviditets- og finansieringskrav oppfylles avhengig av kundeinnskudd, samt kontinuerlig tilgang til kapitalmarkedene, inkludert utstedelse av langsiktige lånemarkedsinstrumenter som obligasjoner med

fortrinnsrett. Volumet på disse finansieringskildene, spesielt langsiktig finansiering, kan bli begrenset i perioder med anstrengt likviditet. Turbulens i de globale finansmarkedene og den globale økonomien kan ha en negativ innvirkning på Nordea-konsernets likviditet samt visse motparters og kunders vilje til å gjøre forretninger med Nordea-konsernet. Dette kan føre til vesentlige negative virkninger på Nordea-konsernets virksomhet og driftsresultat.

- (a) **Bear Sertifikat:** Avkastningen på Instrumentene avhenger av utviklingen til det underliggende aktivumet. Kursen på Instrumentene vil bli justert for utbytte i det underliggende aktivumet. Utviklingen av Instrumentene vil være lik den omvendte daglige utviklingen til det underliggende aktivumet multiplisert med den forhåndsdefinerte giringen. Dette betyr at kursen på Instrumentene øker når kursen på det underliggende aktivumet synker, og synker når kursen på det underliggende aktivumet øker. Valutasvingninger vil også påvirke investeringens utvikling. Hvis den positive utviklingen i underliggende aktiva, justert for gearingsfaktoren, på en enkel handelsdag er 100 % eller høyere vil verdipapiret forfalle førtidig og investor vil tape hele sitt investerte beløp.
- (b) Ved å investere i Instrumentene påtar investoren seg risikoen for at Utstederen ikke vil være i stand til å gjennomføre utbetalinger på verdipapirene i henhold til deres vilkår. Hvis Utstederen blir insolvent, er det risiko for at investorene vil tape hele eller deler av sin investering. Instrumentene består av usikrede og ordinære forpliktelser fra Utstederen og er pari passu uten noen intern preferanse mellom hverandre og

minst pari passu med alle andre utestående, nåværende og fremtidige, ordinære og usikrede gjeldsforpliktelser fra Utstederen. Instrumentene kan også bli gjenstand for krisehåndteringsordningen under direktiv 2014/59/EU, som implementert i Finland, dersom Utstederen blir gjenstand for en avvikling og de kan bli nedskrevet eller konvertert til andre verdipapirer (inkludert til ordinære aksjer) dersom krisehåndteringsmyndigheten bestemmer at dette er nødvendig for å gjenopprette Utstederens levedyktighet.

- (c) Instrumentene er fritt omsettelige i henhold til deres vilkår, men Grunnprospektet oppsummerer likevel visse rettslige begrensninger rundt tilbud og salg av Instrumentene i noen jurisdiksjoner.

*Hvor vil verdipapirene bli handlet?*

Det vil bli søkt om opptak til børsnotering på Nasdaq First North Sweden med virkning fra Issue Date.

*Hva er de viktigste risikoene som er spesifikke for Instrumentene?*

**Produktets kompleksitet** – Instrumentenes avkastningsstruktur er i noen tilfeller kompleks og kan inneholde matematiske formler eller forhold som, for en investor, kan være vanskelige å forstå og sammenligne med andre investeringsalternativer. Vær oppmerksom på at det kan være vanskelig å vurdere forholdet mellom avkastning og risiko.

**Giringsrisikoer** – På grunn av Instrumentenes struktur vil utviklingen av det underliggende aktivumet påvirke kursen på Instrumentet, og dette kan medføre større fortjeneste eller tap på investert kapital enn ved en direkte investering i det underliggende aktivumet. Dette blir som regel uttrykt ved å si at Instrumentene har en giringseffekt sammenlignet med en investering i det underliggende aktivumet, dvs. en kursendring (både positiv og negativ) i det underliggende aktivumet fører til en prosentvis større endring i Instrumentenes verdi. Følgelig er risikoen knyttet til en investering i slike Instrumenter større enn ved en investering i det underliggende aktivumet. Slike Instrumenter kan bli verdiløse.

**Muligheten for at det ikke finnes noe aktivt handelsmarked for Instrumentene** – Instrumentene vil være nye verdipapirer, og det er mulig at disse ikke er vidt distribuert og/eller ikke er børsnoterte, og at de selv om de er børsnoterte, ikke nødvendigvis har noe aktivt handelsmarked. Et manglende aktivt handelsmarked kan medføre redusert likviditet i Instrumentene, med den følge at investoren eventuelt må beholde slike Instrumenter til de innløses.

**Utviklingen i de underliggende aktiva** – Under Instrumentenes vilkår har eierne krav på avkastning og utbetaling av ethvert gjeldende innløsningsbeløp, avhengig av utviklingen til et eller flere underliggende aktiva og den gjeldende avkastningsstrukturen. Instrumentenes utvikling vil til enhver tid i Instrumentenes levetid være påvirket av verdien til de underliggende aktiva, intensiteten i kurssvingningene til de underliggende aktiva, forventninger angående fremtidig volatilitet, markedsrente og forventede utbytter i de underliggende aktiva. I noen tilfeller kan investoren tape all sin investerte kapital.

**Automatisk førtidig innløsning** – Instrumentene kan bli automatisk innløst før deres planlagte forfallsdato dersom visse betingelser er oppfylt, vanligvis omtalt som en «knock». I noen tilfeller kan dette føre til at en investors krav på fremtidige utbetalinger av kupong- eller rentebeløp helt eller delvis går tapt. Siden visse kostnader og utgifter blir trukket fra emisjonskursen, kan en førtidig innløsning medføre proporsjonalt høyere utgifter.

**Risikoer knyttet til markedsavbrudd og ekstraordinære hendelser** – Underliggende aktiva kan påvirkes av avbrudd i deres normale handelsmarkeder eller ekstraordinære hendelser som for eksempel når en notering tas av børsen, nasjonalisering, konkurs, avvikling eller utvannende hendelser som påvirker det aktuelle underliggende aktivumet. Hendelser som for eksempel endringer i lovgivning eller økte kostnader for risikostyring, kan oppstå og berøre alle Instrumenter. Hvis det er tilfellet, kan Utstederen etter eget skjønn foreta justeringer i sammensetningen av aktivaene og beregningen av avkastningen eller Instrumentenes verdi eller erstatte et underliggende aktivum med et annet underliggende aktivum, slik Utstederen anser det

nødvendig.

**Aksjer som underliggende aktiva** – Aksjerelaterte Instrumenter er ikke støttet eller fremmet av utstederen av aksjene. Følgelig har utstederen av aksjene ingen forpliktelse til å ta hensyn til investorers interesser i Instrumentene, og således kan handlingene til en slik aksjeutsteder påvirke Instrumentenes markedsverdi negativt. En investor i Instrumentene har ikke krav på å motta noen utbetalinger eller utbytter som en direkte innehaver av de underliggende aksjene ellers ville ha krav på.

**Risikoer relatert til short-eksponeringer** – En «long»-eksponering betyr at Instrumentets utvikling vil stige når verdien til det underliggende aktivumet øker. I motsetning til dette vil Instrumenter som har en «short»-eksponering, inkludert Bear-sertifikater, synke i verdi når verdien til det underliggende aktivumet øker. En økning i verdien til det underliggende aktivumet kan derfor føre til at investoren taper all eller deler av investert kapital.

Andre risikoer i forbindelse med Instrumenter kan, blant annet, være relatert til endringer i rentesatser og vekslingskurser, om Utstederen er berettiget til å førtidig innløse Instrumentene, kompleksiteten til de finansielle instrumentene, svingninger i de aktuelle indeksene, andre underliggende aktiva eller finansmarkedet, og om tilbakebetaling avhenger av andre omstendigheter enn Utstederens kredittverdighet.
