

IMPORTANT NOTICE

In accessing the attached final terms (the "Final Terms") you agree to be bound by the following terms and conditions.

PROHIBITION OF SALES TO UK RETAIL INVESTORS – The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom ("UK"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 ("EUWA"); (ii) a customer within the meaning of the provisions of the FSMA and any rules or regulations made under the Financial Services and Markets Act 2000 (as amended, the "FSMA") to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. Consequently no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "UK PRIIPs Regulation") for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

The information contained in the Final Terms may be addressed to and/or targeted at persons who are residents of particular countries only as specified in the Final Terms and/or in the Base Prospectus (as defined in the Final Terms) and is not intended for use and should not be relied upon by any person outside those countries and/or to whom the offer contained in the Final Terms is not addressed. **Prior to relying on the information contained in the Final Terms, you must ascertain from the Final Terms and/or the Base Prospectus whether or not you are an intended addressee of the information contained therein.**

Neither the Final Terms nor the Base Prospectus constitutes an offer to sell or the solicitation of an offer to buy securities in the United States or in any other jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration, exemption from registration or qualification under the securities law of any such jurisdiction.

The securities described in the Final Terms and the Base Prospectus have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (the "Securities Act") and may not be offered or sold directly or indirectly within the United States or to, or for the account or benefit of, U.S. persons or to persons within the United States of America (as such terms are defined in Regulation S under the Securities Act ("Regulation S")). The securities described in the Final Terms will only be offered in offshore transactions to non-U.S. persons in reliance upon Regulation S.

What are the Key Risks Specific to the Issuer?

Negative economic developments and conditions in the markets in which the Nordea Group operates can adversely affect the Nordea Group's business and results of operations: The Nordea Group's performance is significantly influenced by the general economic conditions in the Nordic markets (Denmark, Finland, Norway and Sweden). Development of the economic conditions in other markets where the Nordea Group currently operates can also affect the Nordea Group's performance. Economic developments have affected and may continue to affect the Nordea Group's business in a number of ways, including, among others, the income, wealth, liquidity, business and/or financial condition of the Nordea Group's customers, which, in turn, could further reduce the Nordea Group's credit quality and demand for the Nordea Group's financial products and services.

Deterioration in counterparties' credit quality may affect the Nordea Group's financial performance: Risks arising from changes in credit quality and the recoverability of loans and amounts due from counterparties are inherent in a wide range of the Nordea Group's businesses. The Nordea Group makes provisions for loan losses in accordance with IFRS. However, the provisions made are based on available information, estimates and assumptions and are subject to uncertainty, and there can be no assurances that the provisions will be sufficient to cover the amount of loan losses as they occur. Adverse changes in the credit quality of the Nordea Group's borrowers and counterparties or a decrease in collateral values, are likely to affect the recoverability and value of the Nordea Group's assets and require an increase in the Nordea Group's individual provisions and potentially in collective provisions for impaired loans, which in turn would adversely affect the Nordea Group's financial performance. In particular, the Nordea Group's exposure to corporate customers is subject to adverse changes in credit quality should the economic environment in the Nordea Group's markets deteriorate.

The Nordea Group is exposed to market price risk: The Nordea Group's customer-driven trading operations and its treasury operations (where the Nordea Group holds investment and liquidity portfolios for its own account) are the key contributors to market price risk in the Nordea Group. To the extent volatile market conditions persist or recur, the fair value of the Nordea Group's bond, derivative and structured credit portfolios, as well as other classes, could fall more than estimated, and therefore cause the Nordea Group to record write-downs. In addition, because the Nordea Group's trading and investment income depends to a great extent on the performance of financial markets, volatile market conditions could result in a significant decline in the Nordea Group's trading and investment income, or result in a trading loss, which, in turn, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations.

The Nordea Group is subject to extensive regulation that is subject to change: Companies active in the financial services industry, including the Nordea Group, operate under an extensive regulatory regime. The Nordea Group is subject to laws and regulations, administrative actions and policies as well as related oversight from the local regulators in each of the jurisdictions in which it has operations. The Nordea Group is also under the direct supervision and subject to the regulations of the European Central Bank, as a result of the size of its assets. Regulatory developments or any other requirements, restrictions, limitations on the operations of financial institutions and costs involved, or unexpected requirements under, or uncertainty with respect to, the regulatory framework to be applied to the Nordea Group, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations.

Liquidity risk is inherent in the Nordea Group's operations: Liquidity risk is the risk that the Nordea Group will be unable to meet its obligations as they fall due or meet its liquidity commitments only at an increased cost. A substantial portion of the Nordea Group's liquidity and funding requirements is met through reliance on customer deposits, as well as ongoing access to wholesale funding markets, including issuance of long-term debt market instruments, such as covered bonds. The volume of these funding sources, in particular long-term funding, may be constrained during periods of liquidity stress. Turbulence in the global financial markets and economy may adversely affect the Nordea Group's liquidity and the willingness of certain counterparties and customers to do business with the Nordea Group, which may result in a material adverse effect on the Nordea Group's business and results of operations.

- (a) **Bear Certificate:** the return of the Instruments depends on the performance of the underlying asset. The price of the Instruments will be adjusted for dividends in the underlying asset. The performance of the Instruments will be the reversed daily performance of the underlying asset multiplied by the predefined leverage. This means that the price of the Instruments increases when the price of the underlying asset decreases, and decreases when the price of the underlying asset increases. Currency fluctuations will also affect the performance of the investment. If the positive performance, on one single day, reaches or is above the stop loss buffer, the Instruments will terminate and part of or all your amount invested will be lost.. Or, if a stop loss buffer is specified, then if the positive performance, on one single day, multiplied by the leverage is 100 or higher, the Instruments will terminate and all amount invested will be lost.
- (b) By investing in the Instruments, an investor will be assuming the risk that the Issuer will not be able to make payments on the securities in accordance with their terms. On an insolvency of the Issuer, there is a risk that the investors may lose some or all of their investment. The Instruments constitute unsecured and unsubordinated obligations of the Issuer and rank *pari passu* without any preference among themselves and at least *pari passu* with all other outstanding unsecured and unsubordinated obligations of the Issuer, present and future. The Instruments could also be subject to the bail-in power in the event of a resolution of the Issuer under directive 2014/59/EU, as implemented in Finland, and may be written down or converted into other securities (including ordinary shares) if the resolution authority determines that this is necessary in order to restore the viability of the Issuer.
- (c) The Instruments are freely transferable by their terms, although the Base Prospectus summarises certain legal restriction on the offers and sales of Instruments in certain jurisdictions.

Where will the Securities be Traded?

Application has been made for the Instruments to be admitted to listing on Nasdaq First North Sweden and to trading on Nasdaq First North Sweden effective as of the Issue Date.

What are the Key Risks that are Specific to the Securities?

Complexity of the product – The yield structure for the Instruments is sometimes complex and may contain mathematical formulae or relationships which, for an investor, may be difficult to understand and compare with other investment alternatives. It should be noted that the relationship between yield and risk may be difficult to assess.

Leverage Risks – due to the structure of the Instruments, the performance of the underlying asset will affect the price of the Instrument and may lead to larger profits or losses on invested capital than if the investment had been made directly in the underlying asset. This is normally expressed by saying that the Instruments have a leverage effect compared with an investment in the underlying asset, i.e. a change in price (both upwards and downwards) of the underlying asset results, in percentage terms, in a greater change in the value of the Instruments. Consequently, the risk associated with an investment in such Instruments is greater than with an investment in the underlying asset. Such Instruments may become worthless.

There may be no active trading market for the Instruments - The Instruments will be new securities which may not be widely distributed and/or may be unlisted and, even if listed, may not have an active trading

market. The lack of an active trading market may result in reduced liquidity for the Instruments, with the result that the investor may have to hold such Instruments until they are redeemed. Holders of Instruments should be aware that the secondary market for the Instruments and instruments of this kind may be illiquid due to, among other things, the disruptions and volatility in the global financial markets that have continued through recent years. Holders of Instruments should also be aware that inflation could have an adverse effect on the value of the relevant Instruments (including, without limitation, capital protected Instruments), including where the return on the Instruments is below the level of the relevant inflation rate(s).

Performance of the underlying assets – under the terms of the Instruments, the holders are entitled to yield and payment of any applicable settlement amount, depending on the performance of one or more underlying assets and the applicable yield structure. The performance of the Instruments is affected by the value of the underlying assets at specific points in time during the term of the Instruments, the intensity of fluctuations in the prices of the underlying assets, expectations regarding future volatility, market interest rates, and expected dividends on the underlying assets. In some circumstances the investor may lose all of their invested amount.

Automatic early redemption – The Instruments may be redeemed automatically if certain conditions are met, typically referred to as a "knock". In some circumstances, this may result in a loss of part, or all, an investor's future coupon or interest payments in respect of the Instruments. Because certain costs and expenses are deducted from the issue price, an early redemption of the Instruments may also result in proportionately higher expenses.

Risks relating to market disruption and extraordinary events - underlying assets may be affected by disruption to their normal trading markets, or extraordinary events such as delisting, nationalisation, bankruptcy, liquidation or dilutive events affecting the relevant underlying asset. For all Instruments, events such as changes in the law or increased costs for risk management may arise. If so, the Issuer may, at its sole discretion, make any adjustments in the composition of the assets and the calculation of the yield or value of Instruments or replace one underlying asset with another underlying asset, as the Issuer deems necessary.

Risks relating to the underlying asset – the return on the Instruments will depend on the performance of the Underlying Assets. Investors should be aware that the market price of the Instruments may be volatile due to the performance of the Underlying Assets, and the amount payable upon exercise or maturity may be less than the original amount paid for the Instruments, or even zero. Changes in the price of the Underlying Asset may not be directly correlated with the price of the Instruments and a small movement in the value of the Underlying Asset may result in a significant change in the value of the Instruments.

Risks relating to short exposures – a "long" exposure means that the performance of the Instrument will appreciate when the value of the underlying asset increases. Conversely Instruments that have a "short" exposure, including Bear Certificates, will decline in value where the value of the underlying asset increases. A rise in the value of the underlying asset could therefore result in the investor losing some or all of the invested capital.

Other risks associated with Instruments may relate, inter alia, to changes in interest rates, changes in exchange rates, whether the Issuer is entitled to redeem the Instruments prematurely, the complexity of the financial instruments, fluctuations in relevant indices, other underlying assets or the financial market, and whether repayment is dependent on circumstances other than the credit-worthiness of the Issuer.

Hva er de viktigste risikoene som er spesifikke for Utstederen?

Negativ økonomisk utvikling og negative forhold i markedene som Nordea-konsernet har virksomhet i, kan ha negativ effekt på Nordea-konsernets virksomhet og driftsresultater: Nordea-konsernets resultater påvirkes i vesentlig grad av de generelle økonomiske forholdene i de nordiske markedene (Danmark, Finland, Norge og Sverige). Utviklingen i de økonomiske forholdene i andre markeder der Nordea-konsernet for tiden har virksomhet, kan også påvirke resultatene til Nordea-konsernet. Økonomiske utviklingstendenser har påvirket og kan fortsette å påvirke Nordea-konsernets virksomhet på mange måter, herunder blant annet inntekt, formue, likviditet, virksomhetsforhold og/eller finansiell stilling for Nordea-konsernets kunder, som igjen kan redusere Nordea-konsernets kredittverdighet og etterspørsel etter Nordea-konsernets produkter og tjenester.

Forverring av motparters kredittverdighet kan påvirke Nordea-konsernets økonomiske resultat: Risikoer som oppstår som følge av endringer i motparters kredittverdighet og muligheten til tilbakebetaling av lån og forfalte beløp fra motparter er iboende i en lang rekke av Nordea-konsernets forretninger. Nordea-konsernet gjør avsetninger for utlånstap i henhold til IFRS. Avsetningene er imidlertid basert på slik informasjon, slike anslag og antagelser som er tilgjengelig, og vil være beheftet med usikkerhet, og det kan ikke gis noen garantier for at avsetningene vil være tilstrekkelige til å dekke utlånstapene etter hvert som de oppstår. Negative endringer i kredittverdigheten til Nordea-konsernets låntakere og motparter eller en nedgang i sikkerhetsverdier kan forventes å påvirke muligheten til tilbakebetaling og verdien av Nordea-konsernets aktiva og kreve en økning i Nordea-konsernets individuelle avsetninger og potensielt i kollektive avsetninger for misligholdte lån, hvilket igjen ville påvirke Nordea-konsernets finansielle resultat negativt. Nordea-konsernets eksponering mot næringslivskunder er særlig sårbar for negative endringer i kredittverdigheten om den økonomiske situasjonen i Nordea-konsernets markeder skulle forverres.

Nordea-konsernet er eksponert for markedsprisindeksrisiko: Nordea-konsernets kundeorienterte handelsaktiviteter og dets treasury-aktiviteter (der Nordea-konsernet fører investerings- og likviditetsporteføljer i eget navn) er de viktigste bidragsyterne til markedsprisindeksrisikoen i Nordea-konsernet. Dersom volatile markedsforhold vedvarer eller er gjentakende, vil den virkelige verdien til Nordea-konsernets obligasjons-, derivat- og strukturerte kredittporteføljer, så vel som andre investeringsklasser, kunne falle mer enn estimert og dermed føre til at Nordea-konsernet gjør nedskrivninger. Siden Nordea-konsernets handels- og investeringsinntekter videre i stor grad avhenger av utviklingen i finansmarkedene, kan volatile markedsforhold føre til en betydelig nedgang i Nordea-konsernets handels- og investeringsinntekter, eller resultere i tap på trading, som igjen kan ha en vesentlig negativ effekt på Nordea-konsernets virksomhet, økonomiske stilling og driftsresultater.

Nordea-konsernet er gjenstand for omfattende regulering som er i endring: Virksomheten til selskaper som er aktive i markedet for finansielle tjenester, inkludert Nordea-konsernet, er underlagt et omfattende regulatorisk regime. Nordea-konsernet er underlagt lover og forskrifter, administrative tiltak og retningslinjer, så vel som tilhørende tilsyn fra lokale tilsynsmyndigheter i hver jurisdiksjon konsernet har

virksomhet i. Som et resultat av størrelsen på sine aktiva er Nordea-konsernet også underlagt tilsynsmyndigheten til og reguleringsbestemmelser gitt av Den europeiske sentralbanken. Regulatorisk utvikling eller alle andre krav, restriksjoner eller begrensninger av driften til finansinstitusjoner og tilknyttede kostnader, eller uventede krav eller usikkerhet relatert til det regulatoriske rammeverket som gjelder for Nordea-konsernet, kan ha en vesentlig negativ effekt på Nordea-konsernets virksomhet, økonomiske stilling og driftsresultater.

Likviditetsrisiko er iboende i Nordea-konsernets virksomheter: Likviditetsrisiko er risikoen for at Nordea-konsernet ikke vil være i stand til å oppfylle sine forpliktelser etter hvert som de forfaller eller bare kan oppfylle sine likviditetsforpliktelser til økte kostnader. En vesentlig del av Nordea-konsernets likviditets- og kapitalkrav oppfylles ved kundeinnskudd, samt vedvarende tilgang til en gros kapitalmarkeder, herunder ved utstedelse av langsiktige lånemarkedsinstrumenter som obligasjoner med fortrinnsrett. Volumet på disse finansieringskildene, spesielt langsiktig finansiering, kan bli begrenset i perioder med anstrengt likviditet. Turbulens i de globale finansmarkedene og den globale økonomien kan ha en negativ effekt på Nordea-konsernets likviditet samt visse motparters og kunders vilje til å gjøre forretninger med Nordea-konsernet. Dette kan føre til vesentlige negative effekter på Nordea-konsernets virksomhet og driftsresultat.

- (a) Instrumentene er med ISIN
- (b) Instrumentene er utstedt i valuta. Totalt antall Instrumenter er antall og Instrumenten utløper måned, år/er åpne Instrumenter uten fast utløpsdato.
- (c) **Bear Sertifikat:** Avkastningen på Instrumentene avhenger av utviklingen til det underliggende aktivumet. Kursen på Instrumentene vil bli justert for utbytte i det underliggende aktivumet. Utviklingen av Instrumentene vil være lik den omvendte daglige utviklingen til det underliggende aktivumet multiplisert med den forhåndsdefinerte giringen. Dette betyr at kursen på Instrumentene øker når kursen på det underliggende aktivumet synker, og synker når kursen på det underliggende aktivumet øker. Valutasvingninger vil også påvirke investeringens utvikling. Dersom den positive utviklingen uttrykt i prosent, på en enkelt dag, multiplisert med gearingen er større enn eller lik 100, vil Instrumentene bortfalle og all investert kapital vil gå tapt. Eller, hvis en stop-loss-buffer gjelder, og dersom den positive utviklingen uttrykt i prosent, på en enkelt dag, multiplisert med gearingen er større enn eller lik stop-loss-buffere, vil Instrumentene bortfalle og all eller deler av investert kapital vil gå tapt.
- (d) Ved å investere i Instrumentene påtar investoren seg risikoen for at Utstederen ikke vil være i stand til å gjennomføre utbetalinger på instrumentene i henhold til deres vilkår. Hvis Utstederen blir insolvent, er det risiko for at investorene vil tape hele eller deler av sin investering. Instrumentene utgjør usikrede og ordinære forpliktelser for Utstederen og er pari passu uten noen intern preferanse mellom hverandre og minst pari passu med alle andre utestående, nåværende og fremtidige, ordinære og usikrede gjeldsforpliktelser for Utstederen. Instrumentene kan også bli gjenstand for krisehåndteringsordningen under direktiv 2014/59/EU, som implementert i Finland, dersom Utstederen blir gjenstand for en avvikling og de kan bli nedskrevet eller konvertert til andre verdipapirer (inkludert til ordinære aksjer) dersom krisehåndteringsmyndigheten bestemmer at dette er nødvendig for å gjenopprette Utstederens levedyktighet.
- (e) Instrumentene er fritt omsettelige i henhold til deres vilkår, men Grunnprospektet oppsummerer likevel visse rettslige begrensninger rundt tilbud og salg av Instrumentene i noen jurisdiksjoner.

Hvor vil instrumentene bli handlet?

Instrumentene er unoterte Instrumenter/Det vil bli søkt om opptak til notering på Nasdaq First North Sweden og opptak til handel på Nasdaq First North Sweden med virkning fra Issue Date.

Hva er de viktigste risikoene som er spesifikke for Instrumentene?

Produktets kompleksitet – Avkastningsstrukturen til Instrumentene er av og til kompleks og kan inneholde matematiske formler eller sammenhenger som, for en investor, kan være vanskelige å forstå og sammenligne med andre investeringsalternativer. Sammenhengen mellom avkastning og risiko kan videre være vanskelig å vurdere.

Giringsrisikoer – Instrumentene har en struktur som innebærer at utviklingen til det underliggende aktivumet påvirker kursen på Instrumentet, og dette kan medføre større fortjeneste eller tap på investert kapital enn ved en direkte investering i det underliggende aktivumet. Dette blir normalt uttrykt på den måten

at Instrumentene har en gearingeffekt sammenlignet med en investering i det underliggende aktivumet, dvs. at en kursendring (både positiv og negativ) i det underliggende aktivumet fører til en prosentvis større endring i Instrumentenes verdi. Følgelig er risikoen forbundet med en investering i slike Instrumenter større enn ved en investering i det underliggende aktivumet. Slike Instrumenter kan bli verdiløse.].

Muligheten for at det ikke finnes noe aktivt handelsmarked for Instrumentene – Instrumentene vil være nye verdipapirer, og det er mulig at disse ikke vil bli vidt distribuert og/eller børsnoterte, og at de selv om de er børsnoterte, ikke nødvendigvis vil ha noe aktivt handelsmarked. Mangelen på et aktivt handelsmarked kan medføre redusert likviditet for Instrumentene, med den følge at investoren kan komme til å måtte eie slike Instrumenter frem til innfrielsestidspunktet. [Nordea har ingen forpliktelse til å kjøpe tilbake eller opprettholde et marked for noen Instrumenter.] Innehavere av Instrumenter bør være oppmerksomme på at annenhåndsmarkedet for Instrumentene eller instrumenter av denne typen kan være illikvid som følge av, blant annet, forstyrrelser og volatilitet på de globale finansmarkedene som har fortsatt gjennom de seneste år. Innehavere av Instrumenter bør også være oppmerksomme på at inflasjon kan ha en negativ påvirkning på verdien til de relevante Instrumentene (herunder, men ikke bare, kapitalbeskyttede Instrumenter), herunder hvor avkastningen på Instrumentene er under nivået på den relevante inflasjonen.

Utviklingen i de underliggende aktiva – I henhold til Instrumentenes vilkår er innehaverne berettiget til avkastning og utbetaling av eventuelt avregningsbeløp, avhengig av kursutviklingen til et eller flere underliggende aktiva og av den relevante avkastningsstrukturen. Verdien til Instrumentene påvirkes av verdien til de underliggende aktiva på bestemte tidspunkter i Instrumentenes levetid, intensiteten i kurssvingningene til de underliggende aktiva, forventninger til fremtidig volatilitet, markedsrenten og forventede utbytter i de underliggende aktiva. I noen tilfeller kan investoren tape all sin investerte kapital.

Automatisk førtidig innfrielse – Instrumentene kan bli automatisk innfridd før deres planlagte utløpsdato dersom visse betingelser oppfylles, vanligvis omtalt som en «knock». I noen tilfeller kan dette føre til at en investors krav på fremtidige utbetalinger av kupong- eller rentebeløp helt eller delvis går tapt. Siden visse kostnader og utgifter blir trukket fra emisjonskursen, kan en førtidig innfrielse medføre proporsjonalt høyere utgifter.

Valutasvingninger og valutakurser som underliggende aktiva – Når det underliggende aktivumet er en valutakurs eller er notert i en annen valuta enn investorens valuta, kan valutasvingninger påvirke avkastningen på Instrumentene. Valutakurser kan påvirkes av komplekse politiske og økonomiske faktorer, inkludert relative inflasjonsrater, handelsbalansen mellom land, graden av overskudd eller underskudd på statsbudsjettet, samt penge-, skatte- og/eller handelspolitikken som føres av myndighetene i landene med de relevante valutaene. Valutasvingninger kan også på komplekse måter påvirke verdien eller nivået til underliggende aktiva. Dersom slike valutasvingninger fører til svingninger i verdien eller nivået til de underliggende aktivaene, kan verdien eller nivået til Instrumentene falle. Dersom verdien eller nivået til en eller flere underliggende aktiva er denominert i en annen valuta enn Instrumentene, kan investorene bli eksponert for økt valutarisiko. Historiske valutakurser gir ikke nødvendigvis en indikasjon på fremtidige valutakurser.

Risiko knyttet til markedsforstyrrelser og ekstraordinære hendelser – Underliggende aktiva kan påvirkes av forstyrrelser i markedene hvor de til vanlig omsettes, eller slike ekstraordinære hendelser som for eksempel strykning fra børsnotering, nasjonalisering, konkurs, likvidasjon eller andre forhold som utvanner verdien til det relevante underliggende aktivumet. For alle Instrumenter kan det inntreffe hendelser slik som for eksempel lovendringer eller økte kostnader for risikostyring. I et slikt tilfelle kan Utstederen etter eget skjønn foreta justeringer i sammensetningen av aktiva og beregningen av avkastningen eller verdien til Instrumentene eller erstatte et underliggende aktivum med et annet underliggende aktivum, alt ettersom Utstederen finner det nødvendig.

Risiko knyttet til underliggende aktiva – Avkastning på Instrumentene vil avhenge av utviklingen til det underliggende aktiva. Investorer bør være oppmerksomme på at markedsprisen på Instrumentene kan være volatil som følge av utviklingen til det underliggende aktiva, og at beløpet som utbetales ved førtidig

innfrielse eller utløp vil kunne være mindre enn beløpet som opprinnelig ble betalt for Instrumentet, eller til og med null. Endringer i prisen på det underliggende aktiva er ikke nødvendigvis direkte korrelert med prisen på Instrumentet, og en mindre endring i verdien av det underliggende aktiva kan føre til en vesentlig endring i verdien av Instrumentet.

Risikoer relatert til short-eksponering – En «long»-eksponering betyr at Instrumentets utvikling vil stige når verdien til det underliggende aktivumet stiger. I motsetning til dette vil Instrumenter som har en «short»-eksponering, inkludert Bear-sertifikater, falle i verdi når verdien til det underliggende aktivumet stiger. En stigning i verdien til det underliggende aktivumet kan derfor føre til at investoren taper all eller deler av investert kapital.

Annen risiko i forbindelse med Instrumenter kan blant annet relatere seg til renteendringer, valutakursendringer, hvorvidt Utstederen er berettiget til å førtidig innfri Instrumentene, kompleksiteten til de finansielle instrumentene, svingninger i relevante indekser, andre underliggende aktiva eller finansmarkedet, samt hvorvidt innfrielse avhenger av andre faktorer enn Utstederens kredittverdighet.
