* Nordea's policy has been to amortise resolution fees and deposit guarantee fees linearly over the year. Starting from 1 January 2019, Nordea has recognised resolution fees at the beginning of the year when the legal obligation to pay arises and presents the related expenses as "other expenses". The change mainly reflects the change in the structure of the resolution fees following the re-domiciliation of the parent company of the Nordea Group from Sweden to Finland. In the unaudited consolidated interim financial statements of the Nordea Group for the nine months ended and as of 30 September 2019, the comparative figures for the nine months ended and as of 30 September 2018 and the years ended 31 December 2018 and 31 December 2017 have been restated accordingly to enhance comparability. The figures marked with an asterisk (*) have been restated to reflect the changed recognition and presentation of resolution fees.

What are the Key Risks Specific to the Issuer?

Negative economic developments and conditions in the markets in which the Nordea Group operates can adversely affect the Nordea Group's business and results of operations: The Nordea Group's performance is significantly influenced by the general economic conditions in the Nordic markets (Denmark, Finland, Norway and Sweden). Development of the economic conditions in other markets where the Nordea Group currently operates can also affect the Nordea Group's performance. Adverse economic developments have affected and may continue to affect the Nordea Group's business in a number of ways, including, among others, the income, wealth, liquidity, business and/or financial condition of the Nordea Group's customers, which, in turn, could further reduce the Nordea Group's credit quality and demand for the Nordea Group's financial products and service.

Deterioration in counterparties' credit quality may affect the Nordea Group's financial performance: Risks arising from changes in credit quality and the recoverability of loans and amounts due from counterparties are inherent in a wide range of the Nordea Group's businesses. The Nordea Group makes provisions for loan losses in accordance with IFRS. However, the provisions made are based on available information, estimates and assumptions and are subject to uncertainty, and there can be no assurances that the provisions will be sufficient to cover the amount of loan losses as they occur. Adverse changes in the credit quality of the Nordea Group's borrowers and counterparties or a decrease in collateral values, are likely to affect the recoverability and value of the Nordea Group's assets, which in turn would adversely affect the Nordea Group's financial performance. In particular, the Nordea Group's exposure to corporate customers is subject to adverse changes in credit quality should the economic environment in the Nordea Group's markets deteriorate.

The Nordea Group is exposed to market price risk: The Nordea Group's customer-driven trading operations and its treasury operations (where the Nordea Group holds investment and liquidity portfolios for its own account) are the key contributors to market price risk in the Nordea Group. To the extent volatile market conditions persist or recur, the fair value of the Nordea Group's bond, derivative and structured credit portfolios, as well as other classes, could fall more than estimated, and therefore cause the Nordea Group to record write-downs. In addition, because the Nordea Group's trading and investment income depends to a great extent on the performance of financial markets, volatile market conditions could result in a significant decline in the Nordea Group's trading and investment income, or result in a trading loss, which, in turn, could have a

material adverse effect on the Nordea Group's business, financial condition and results of operations.

The Nordea Group's business performance could be affected if its capital adequacy ratios are reduced or perceived to be inadequate. The Nordea Group is required to maintain certain capital adequacy ratios pursuant to EU and Finnish legislation. Local regulators may, nevertheless, require higher capital buffers than those required under current or proposed future regulations. Any such requirements, or perception by debt and equity investors, analysts or other market professionals that the capital buffers should be higher, or any concern regarding compliance with future capital adequacy requirements, could increase the Nordea Group's borrowing costs, limit its access to capital markets or result in a downgrade in its credit ratings, which could have a material adverse effect on its results of operations, financial condition and liquidity.

The Nordea Group faces competition in all markets: There is competition for the types of banking and other products and services that the Nordea Group provides and there can be no assurances that the Nordea Group can maintain its competitive position. If the Nordea Group is unable to provide competitive product and service offerings, it may fail to attract new customers and/or retain existing customers, experience decreases in its interest, fee and commission income, and/or lose market share, the occurrence of any of which could have a material adverse effect on its business, financial condition and results of operations.

The Nordea Group is subject to extensive regulation that is subject to change: Companies active in the financial services industry, including the Nordea Group, operate under an extensive regulatory regime. The Nordea Group is subject to laws and regulations, administrative actions and policies as well as related oversight from the local regulators in each of the jurisdictions in which it has operations. The Nordea Group is also under the direct supervision and subject to the regulations of the European Central Bank, as a result of the size of its assets. Regulatory developments or any other requirements, restrictions, limitations on the operations of financial institutions and costs involved, or unexpected requirements under, or uncertainty with respect to, the regulatory framework to be applied to the Nordea Group, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations.

Liquidity risk is inherent in the Nordea Group's operations. Liquidity risk is the risk that the Nordea Group will be unable to meet its obligations as they fall due or meet its liquidity commitments only at an increased cost. A substantial portion of the Nordea Group's liquidity and funding requirements is met through reliance on customer deposits, as well as ongoing access to wholesale funding markets, including issuance of long-term debt market instruments, such as covered bonds. The volume of these funding sources, in particular long-term funding, may be constrained during periods of liquidity stress. Turbulence in the global financial markets and economy may adversely affect the Nordea Group's liquidity and the willingness of certain counterparties and customers to do business with the Nordea Group, which may result in a material adverse effect on the Nordea Group's business and results of operations.

Operational risks, including risks in connection with investment advice, may affect the Nordea Group's business. The Nordea Group's business operations are dependent on the ability to process a large number of complex transactions across different markets in many currencies. The Nordea Group's operations are carried out through a number of entities. Operational losses, including monetary damages, reputational damage, costs, and direct and indirect financial losses and/or write-downs, may result from many different sources. As a part of its banking and asset management activities, the Nordea Group also provides its customers with investment advice, access to internally as well as externally managed funds and serves as custodian of third party funds. In the event of losses incurred

by its customers due to investment advice from the Nordea Group, or the misconduct or fraudulent actions of external fund managers, the Nordea Group's customers may seek compensation from the Nordea Group. Although the Nordea Group has implemented risk controls and taken other actions to mitigate exposures and/or losses, there can be no assurances that such procedures will be effective in controlling each of the operational risks faced by the Nordea Group.

3. Key Information on the Securities

What are the Main Features of the Securities?

- (a) The Notes are Non-Tranched Credit Linked Notes in Registered Form bearing ISIN SE0012257582.
- (b) The Notes are issued in SEK in denominations of SEK 10,000. The total nominal amount of the Notes will be specified in the Final Terms Confirmation Announcement following completion of the Offer Period. The Notes mature in January 2025.
- (c) **Non-tranched CLN:** The return of the Notes depends on the number of credit events affecting the Reference Entity during the observation period. Bankruptcy, failure to pay, restructuring and governmental intervention are examples that could constitute a credit event. If no credit events occur in respect of the Reference Entity during the observation period, the Notes will pay the nominal amount on the redemption date the Notes and will pay a fixed interest on each interest payment date. If one or more credit events occurs in respect of the Reference Entity during the observation period, each credit event will decrease the nominal amount of the Notes based on the market recovery for the Reference Entity and there will be no further interest payments. The Notes will pay the adjusted nominal amount on the redemption date.
- (d) By investing in the Notes, an investor will be assuming the risk that the Issuer will not be able to make payments on the securities in accordance with their terms. On an insolvency of the Issuer, there is a risk that the investors may lose some or all of their investment. The Notes constitute unsecured and unsubordinated obligations of the Issuer and rank *pari passu* without any preference among themselves and at least *pari passu* with all other outstanding unsecured and unsubordinated obligations of the Issuer, present and future. The Notes could also be subject to the bail-in power in the event of a resolution of the Issuer under directive 2014/59/EU, as implemented in Finland, and may be written down or converted into other securities (including ordinary shares) if the resolution authority determines that this is necessary in order to restore the viability of the Issuer.
- (e) The Notes are freely transferable by their terms, although the Base Prospectus summarises certain legal restriction on the offers and sales of Notes in certain jurisdictions.

Where will the Securities be Traded?

Application has been made for the Notes to be admitted to trading on Nasdaq Stockholm effective as of 11 October 2019.

What are the Key Risks that are Specific to the Securities?

Complexity of the product: the performance structure for structured Notes is sometimes complex and may contain mathematical formulae or relationships which, for an investor, may be difficult to understand and compare with other investment alternatives. In addition, the relationship between yield and risk may be difficult to assess.

Notes are not principal protected: the Notes are not principal protected and as a result an investor may lose all or part of the invested amount.

There may be no active trading market for the Notes: the Notes will be new securities which may not be widely distributed and/or may be unlisted and, even if listed, may not have an active trading market. The lack of an active trading market may result in reduced liquidity for the Notes, with the result that the investor may have to hold such Notes until they are redeemed. Nordea is under no obligation to buy back or make a market in any Notes.

Performance of the Reference Assets: with structured Notes, the Noteholder's right to yield and repayment of principal depends on the performance of one or more underlying assets (the "**Reference Assets**") and the performance structure. The value of the Notes may be affected by the value of the Reference Assets at specific points during the term of the relevant Notes, the intensity of the price fluctuations of the Reference Asset(s), expectations regarding future volatility, market interest rates and expected distributions on the Reference Asset(s). The value of Notes can fluctuate above or below their issue price during the lifetime of such Notes. Where there is a high level of interdependence between the individual basket constituents, any move in the performance of the basket constituents will exaggerate the performance of the Notes. In addition to exposure to the Reference Assets, an investment in Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Notes.

Currency fluctuations: foreign exchange rates may be affected by complex political and economic factors, including relative rates of inflation, interest rate levels, the balance of payments between countries, the extent of any governmental surplus or deficit and the monetary, fiscal and/or trade policies pursued by the governments of the relevant currencies. Currency fluctuations may affect the value or level of the Reference Assets in complex ways. If such currency fluctuations cause the value or level of the Reference Assets to vary, the value or level of the Notes may fall. If the value or level of one or more Reference Asset(s) is denominated in a currency that is different from the currency of the Notes, investors in the Notes may be subject to increased foreign exchange risk. Previous foreign exchange rates are not necessarily indicative of future foreign exchange rates.

Risks relating to market disruption and extraordinary events: Reference Assets may be affected by disruption to their normal trading markets, or extraordinary events such as delisting, nationalisation, bankruptcy, liquidation or dilutive events affecting the relevant Reference Asset. For all structured Notes, events such as changes in the law or increased costs for risk management may arise. If so, the Issuer may, at its sole discretion, make any adjustments in the composition of the assets and the calculation of the yield or value of Notes or replace one Reference Asset with another Reference Asset, as the Issuer deems necessary.

Credit-Linked Notes: an investment in credit-linked Notes entails exposure to the credit risk of a particular Reference Entity or basket of Reference Entities in addition to that of the Issuer. A fall in the creditworthiness of a Reference Entity can have a significant adverse impact on the market value of the related Notes and any payments of principal/interest due. Upon the occurrence of a Credit Event, the Issuer's obligation to pay principal may be replaced by an obligation to pay other amounts calculated by reference to the value of the Reference Entity. As none of the Reference Entities contributed to the preparation of the Base Prospectus, there can be no assurance that all material events or information regarding the financial performance and creditworthiness of Reference Entities have been disclosed at the time the Notes are issued.

The Issuer's costs will be reflected in the purchase price charged by the Issuer to the relevant purchaser, distributor or Authorised Offeror (as applicable). Other Authorised Offerors may, however, charge expenses to investors. * Nordeas policy har varit att amortera resolutionsavgifter och insättningsgarantiavgifter linjärt över verksamhetsåret. Från och med den 1 januari 2019 har Nordea erkänt resolutionsavgifter i början av det år som den legala betalningsskyldigheten uppstår och presenterar därtill relaterade kostnader som "övriga kostnader". Förändringen speglar främst ändringen av strukturen för resolutionsavgifterna som följer av att moderbolaget inom Nordeakoncernen har flyttats från Sverige till Finland. I Nordeakoncernens oreviderade, konsoliderade delårsrapport för den niomånadersperiod som avslutades den 30 september 2019 har jämförelsetal för den niomånadersperiod som avslutades den 30 september 2018 och verksamhetsåren som avslutades den 31 december 2018 respektive den 31 december 2017 justerats för att förstärka jämförbarheten. De siffror som är markerade med en asterisk (*) har justerats för att spegla den förändrade presentationen av resolutionsavgifter.

Vilka är de centrala riskerna specifika för Emittenten?

Negativ ekonomisk utveckling och förhållanden på marknaden på vilken Nordeakoncernen verkar kan ha en negativ inverkan på Nordeakoncernens verksamhet och rörelseresultat: Nordeakoncernens resultat påverkas i hög grad av generella ekonomiska förhållanden på de nordiska marknaderna (Danmark, Finland, Norge och Sverige). Utvecklingen av de ekonomiska förhållandena på andra marknader där Nordeakoncernen för tillfället verkar kan också påverka Nordeakoncernens resultat. Negativ ekonomisk utveckling har påverkat, och kan komma att fortsätta påverka Nordeakoncernens verksamhet på flera sätt, bland annat Nordeakoncernens kunders intäkter, tillgångar, likviditet, verksamhet och/eller finansiell status, vilket i sin tur kan försämra Nordeakoncernens kreditvärdighet samt efterfrågan på Nordeakoncernens finansiella produkter och tjänster.

Försämring av motparter kreditvärdighet kan påverka Nordeakoncernens finansiella resultat: Risker förenade med förändringar av kreditvärdigheten hos, och möjligheten till återbetalning av lån och förfallna belopp från, motparter är inneboende i stora delar av Nordeakoncernens verksamhetsområden. Nordeakoncernen gör avsättningar för kreditförluster i enlighet med IFRS. Avsättningarna är dock baserade på tillgänglig information, uppskattningar och antaganden och är föremål för osäkerhet, och det är inte säkert att avsättningarna kommer vara tillräckliga för att täcka kreditförluster när de väl uppstår. Negativa förändringar av Nordeakoncernens låntagares och motparter kreditvärdighet, eller en försämring av värdet på säkerheter påverkar sannolikt möjligheten till återbetalning och värdet på Nordeakoncernens tillgångar, vilket i sin tur skulle ha en negativ inverkan på Nordeakoncernens finansiella resultat. I synnerhet är Nordeakoncernens exponering mot företagskunder föremål för försämrade kreditvärdighet för det fall ekonomin på Nordeakoncernens marknader försämras.

Nordeakoncernen är utsatt för marknadsprisrisk: Nordeakoncernens kunddrivna värdepappershandel och treasury funktion (där Nordeakoncernen håller investerings- och likviditetsportföljer för egen räkning) är de största bidragande faktorerna till Nordeakoncernens marknadsprisrisk. I den utsträckning volatila marknadsförhållanden håller i sig eller återkommer, kan värdet på Nordeakoncernens obligations-, derivat- och strukturerade kreditportföljer, likväl som andra typer av instrument, minska mer än beräknat, och därför medföra nedskrivningar. Utöver det kan volatila marknadsförhållanden, på grund av att Nordeakoncernens handels- och investeringsintäkter till stor del är beroende av förhållandena på de finansiella

marknaderna, resultera i en avsevärd nedgång i Nordeakoncernens handels- och investeringsintäkter, eller resultera i en handelsförlust, vilket i sin tur kan ha en väsentlig negativ inverkan på Nordeakoncernens verksamhet, finansiella ställning och verksamhetsresultat.

Nordeakoncernens verksamhetsresultat kan påverkas om dess kapitaltäckningsgrad sjunker eller uppfattas som otillräckliga: Nordeakoncernen måste upprätthålla vissa kapitaltäckningsnivåer enligt EU- och finsk rätt. Lokala tillsynsmyndigheter kan dessutom kräva större kapitalbuffert än vad som krävs enligt nuvarande eller föreslagna regler. Sådana krav, eller uppfattningen bland skuld- och kapitalinvesterar, analytiker eller andra marknadskunniga att kapitalbuffert bör vara större, eller annan osäkerhet kring efterlevnaden av framtida kapitaltäckningskrav, kan öka Nordeakoncernens lånekostnader, begränsa tillgången till kapitalmarknaden eller resultera i sämre kreditvärdering, vilket kan få en väsentlig negativ inverkan på Nordeakoncernens verksamhetsresultat, finansiella ställning och likviditet.

Nordeakoncernen är konkurrensutsatt på alla marknader: Det råder konkurrens inom de former av bankverksamhet och avseende andra produkter och tjänster som Nordeakoncernen tillhandahåller och det kan inte garanteras att Nordeakoncernen kan behålla sin konkurrenskraftiga position. Om Nordeakoncernen inte kan erbjuda konkurrenskraftiga produkter och tjänster, kan den komma att misslyckas med att attrahera nya kunder och/eller behålla existerande kunder, uppleva minskade ränteintäkter, avgifter och arvoden, och/eller förlora marknadsandelar, vilket skulle kunna ha en väsentlig negativ inverkan på Nordeakoncernens verksamhet, finansiella ställning och verksamhetsresultat.

Nordeakoncernen är föremål för omfattande regelverk som är föremål för förändringar: Alla bolag verksamma inom den finansiella sektorn, inklusive Nordeakoncernen, bedriver sin verksamhet under omfattande regulatoriska regelverk. Nordeakoncernen är föremål för tillsyn och måste följa ett stort antal lagar och regler, administrativa påbud och policys i de olika jurisdiktioner som koncernen verkar inom. På grund av storleken på Nordeakoncernens tillgångar står den också under direkt tillsyn av Europeiska Centralbanken och är föremål för dess regelverk. Regulatoriska förändringar och andra krav, restriktioner och begränsningar av finansiella instituts verksamhet och kostnader hänförliga därtill, eller oväntade krav under, eller osäkerhet kring, det regulatoriska ramverk som Nordeakoncernen träffas av, kan ha en väsentlig negativ inverkan på Nordeakoncernens verksamhet, finansiella ställning och verksamhetsresultat.

Det finns en inneboende likviditetsrisk i Nordeakoncernens verksamhet: Likviditetsrisk är risken för att Nordeakoncernen inte ska kunna betala sina skulder när de förfaller eller nå upp till likviditetsåtaganden endast till en högre kostnad. En stor del av Nordeakoncernens likviditets- och finansieringskrav uppfylls genom insättningar från kunder, samt kontinuerlig tillgång till interbankmarknaderna, bland annat genom utfärdandet av långfristiga skuldebrev, såsom säkerställda obligationer. Storleken på dessa finansieringskällor, särskilt den långfristiga finansieringen, kan vara begränsad under perioder med begränsad likviditet. Oroligheter på de globala finansmarknaderna och i den globala ekonomin kan inverka negativt på Nordeakoncernens likviditet och vissa motparter och kunders benägenhet att göra affärer med Nordeakoncernen, vilket kan få en väsentlig negativ effekt på Nordeakoncernens verksamhet och verksamhetsresultat.

Operationella risker, inklusive risker i samband med investeringsrådgivning, kan påverka Nordeakoncernens verksamhet: För att Nordeakoncernens verksamhet ska fungera måste koncernen kunna genomföra ett stort antal komplexa transaktioner på olika marknader i många valutor. Nordeakoncernen bedriver sin verksamhet genom flera olika bolag. Verksamhetsförluster, inklusive skadestånd, försämrat rykte, kostnader, direkta

och indirekta ekonomiska förluster och/eller nedskrivningar kan uppstå av flera olika orsaker. Som en del av bankverksamheten och tillgångsförvaltningen erbjuder Nordeakoncernen sina kunder investeringsrådgivning, tillgång till internt såväl som externt förvaltade fonder samt agerar förvaringsinstitut för fonder som förvaltas av tredje part. För det fall förluster uppstår hos kunder som fått investeringsrådgivning från Nordeakoncernen, alternativt på grund av försummelse eller bedrägliga handlingar av externa fondförvaltare, kan Nordeakoncernen krävas på ersättning. Trots att Nordeakoncernen har implementerat riskkontroller och vidtagit andra åtgärder för att minska exponeringen och/eller förlusterna, finns inga garantier för att åtagandena kommer att vara effektiva i att hantera de olika verksamhetsrisker som Nordeakoncernen står inför.

3. Central information om Värdepappren

Vad är Värdepapprens centrala egenskaper?

- (a) Lånen är Trancherade Kreditlänkade Lån i registrerad form med SE0012257582.
- (b) Lånen är utgivna i SEK med denominering 10 000 SEK. Det totala nominella beloppet för Lånen kommer att specificeras i Bekräftelsen av de Slutliga Villkoren som presenteras efter att Erbjudandeperioden avslutats. Lånen förfaller i januari 2025.
- (c) ***Icke-Trancherade Kreditlänkade Lån:*** Avkastningen på Lånen beror på om det sker kredithändelser i förhållande till Referensenheten under observationsperioden. Om inga kredithändelser har inträffat under observationsperioden, kommer Lånen att betala det nominella beloppet på återbetalningsdagen och en bestämd ränta vid varje räntebetalningsdag. Om en eller fler kredithändelser inträffar i förhållande till Referensenheten under observationsperioden, kommer varje kredithändelse minska Lånens nominella belopp baserat på marknadsvärdet på Referensenhetens skuldförbindelser och inga ytterligare räntebetalningar kommer att göras på Lånen.
- (d) Genom att investera i Lånen bär investeraren risken för att Emittenten inte kommer att kunna göra några betalningar under värdepappren i enlighet med dess villkor. Lånen utgör icke säkerställda och icke efterställda förpliktelser för Emittenten och är i förmånsrättsligt hänseende pari passu utan inbördes rangordning och åtminstone pari passu med Emittentens alla övriga nuvarande och framtida utestående icke säkerställda och icke efterställda förpliktelser. Lånen kan också bli föremål för skuldnedskrivning om Emittenten bli föremål för resolution enligt direktiv 2014/59/EU, så som det implementerats i Finland, och därmed skrivs ner eller ombildas till andra värdepapper (inklusive ordinarie aktier) om resolutionsmyndigheten anser att det är nödvändigt för att återställa Emittentens möjlighet till fortlevnad.
- (e) Lånen är fritt omsättningsbara enligt dess villkor. Grundprospektet sammanfattar dock vissa legala restriktioner vad gäller erbjudande och försäljning av Lånen i vissa jurisdiktioner.

Var kommer Värdepappren handlas?

Ansökan har gjorts för Lånen för att godkännas för upptagande till handel på Nasdaq Stockholm med effekt från 11 oktober 2019.

Vilka är de centrala riskerna som är specifika för Värdepappren?

Produktens komplexitet: avkastningsstrukturen för strukturerade Lån är ibland komplex och kan innehålla matematiska formler eller samband som för en investerare kan vara svåra att förstå och jämföra med andra investeringsalternativ. Förhållandet mellan risk och avkastning kan dessutom vara svårt att utvärdera.

Lånens nominella belopp är inte kapitalskyddade: lånen nominella belopp är inte kapitalskyddade och som följd kan en investerare förlora delar av eller hela det investerade beloppet.

Det kan komma att saknas en aktiv marknad för handel med Lånen: Lånen kommer att vara nya värdepapper som eventuellt inte kommer att spridas i någon större utsträckning och/eller inte vara noterade och, även om de skulle vara noterade, kan komma att sakna en aktiv marknad. Avsaknaden av en aktiv marknad kan resultera i begränsad likviditet i Lånen, med följden att investeraren kan behöva inneha Lån till dess att de löses in. Nordea har ingen skyldighet att köpa tillbaka eller skapa en marknad för några Lån.

Referenstillgångarnas värdeutveckling: för strukturerade Lån är Innehavarnas rätt till avkastning och återbetalning av kapitalbeloppet, beroende av värdeutvecklingen för en eller flera underliggande tillgångar ("Referenstillgångar") och den gällande avkastningsstrukturen. Värdet på strukturerade Lån påverkas av värdet på Referenstillgångarna vid vissa tidpunkter under Lånens löptid, hur mycket priserna hos Referenstillgångarna varierar, förväntningarna angående den framtida volatiliteten, marknadsräntor och förväntad utdelning på Referenstillgångarna. Lånens värde kan komma att fluktuera och över- eller understiga priset under Lånens löptid. Om enskilda komponenter i korgen i hög grad är beroende av varandra kan en ändring i värdeutvecklingen hos korgens delar förstärka Lånens värdeutveckling. Utöver exponeringen mot Referenstillgångar medför en investering i Lånen en risk för att efterföljande förändringar i marknadsräntan kan på ha en negativ påverkan på Lånens värde.

Valutafluktuationer: Växelkurserna för utländska valutor kan påverkas av komplexa politiska och ekonomiska faktorer, inklusive relativa inflationstakter, räntenivåer, betalningsbalansen mellan länder, storleken på staters budgetöverskott eller budgetunderskott och monetära-, skattemässiga och/eller handelspolitiska policyer som följs av de relevanta valutornas stater. Valutafluktuationer kan påverka värdet eller nivån hos Referenstillgångarna på komplexa sätt. Om sådana valutafluktuationer får värdet eller nivån hos Referenstillgångarna att variera, så kan värdet eller nivån på Lånen minska. Om värdet eller nivån hos en eller flera Referenstillgångar är angivna i en valuta som är annan än valutan i vilken Lånen är emitterade, kan den som investerar i Lånen utsättas för en ökad risk hänförlig till växelkurser för utländska valutor. Historiska växelkurser för utländska valutor behöver inte nödvändigtvis utgöra en indikation beträffande framtida växelkurser.

Risker relaterade till störningar på marknaden och extraordinära händelser: Referenstillgångar kan påverkas av störningar på de marknader där de vanligen handlas eller av extraordinära händelser såsom avnotering, nationalisering, konkurs, likvidation eller utspädning av den berörda Referenstillgången. Alla strukturerade Lån kan bli föremål för händelser såsom lagändringar eller ökade kostnader för riskhantering. Om det sker kan Emittenten ensidigt göra justeringar i tillgångarnas sammansättning och i beräkningen av avkastningen eller värdet på Lånen, eller ersätta en Referenstillgång med en annan Referenstillgång, utefter vad Emittenten finner lämpligt.

Kreditlänkade Lån: en investering i kreditlänkade Lån för med sig en exponering för kreditrisken hos en specifik Referensenhet eller korg av Referensenheter, utöver

kreditrisken i förhållande till Emittenten. En försämrad kreditvärdighet hos en Referensenhet kan ha en väsentlig negativ inverkan på marknadsvärdet för de relevanta Lånen och betalningarna av kapitalbeloppet och upplupen ränta. När en Kredithändelse inträffar kan Emittentens skyldighet att betala kapitalbeloppet ersättas av en skyldighet att betala andra belopp beräknade med referens till värdet hos Referensenheten. Eftersom inga av Referensenheterna bidrog till framställandet av Grundprospektet finns ingen garanti för att alla väsentliga händelser eller information som relaterar till finansiell värdeutveckling eller kreditvärdigheten hos Referensenheterna har offentliggjorts vid den tidpunkt då Lånen emitterades.
