Stronger earnings in all major regions

Atea's full-year 2014 earnings demonstrated sound margin improvement in all geographical regions, as well as ample cash flow generation. However, the overall credit profile continued to slide slowly due to a high dividend and increased focus on business acquisitions.

Improved earnings y/y in 2014

Atea posted improved earnings y/y in 2014, positively affected by increased growth and product margins. Turnover increased by 11% y/y, reflecting revenue growth in all countries and across all of the group's major lines of business. Overall EBITDA jumped by 33% y/y and the overall EBITDA margin strengthened to 3.8% (2013: 3.2%). The improvement in profitability is mainly attributable to higher product margins.

Slightly higher leverage

The group's net debt (including pension liabilities) nearly doubled during 2014, ending the year at NOK 830m (2013: NOK 420m). The group's sound operating cash flow was more than offset by the dividend and cash payments for business acquisitions. Consequently, the net debt to EBITDA and total debt to capitalisation ratios weakened to 0.9x and 28% (2013: 0.6x and 25%), respectively.

Credit view

We maintain our view of Atea as a BBB- credit, reflecting our assessment of a Fair business risk profile and a Modest financial risk profile. The financial performance in 2014 was more than satisfactory, with improved margins in all major geographic segments. However, we argue that the group's financial flexibility has weakened owing to high dividend payments and increased focus on growth through acquisitions.

Stronger earnings in all major regions

Atea's full-year 2014 earnings demonstrated sound margin improvement in all major geographical regions, as well as ample cash flow generation. However, the overall credit profile continued to slide slowly due to high dividend and increased focus on business acquisitions.

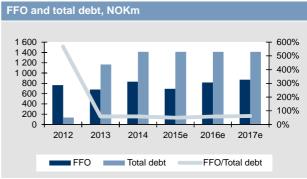

Improved earnings

Atea posted improved y/y earnings in 2014, positively affected by increased growth and higher product margins. Turnover increased by 11% y/y to NOK 24.6bn (2013: NOK 22.1bn), reflecting revenue growth across all countries and across all of the group's major lines of business. Overall EBITDA jumped by 33% y/y to NOK 929m (2013: NOK 701m) and the overall EBITDA margin strengthened to 3.8% (2013: 3.2%). The improvement in profitability is mainly attributable to higher product margins.

Stronger operating cash flow

The group's FFO (funds from operations) grew by 22% y/y, while operating cash flow was in line with the level from last year. Atea's operating cash flow in 2014 was more than sufficient to cover net capex and dividends. However, free operating cash flow after investments turned negative, mainly owing to acquisitions of businesses amounting to NOK 457m.

Sales EBITDA

Atea's segment reporting is divided geographically and the group posted higher earnings in every geographical segment, apart from the Baltic area. However, the Baltic region is a marginal segment for Atea, representing around 3% of group revenues.

Segment Norway (2014: 28% of group revenues) experienced higher sales of the product business, driven by growth in clients and client-related software. Furthermore, the segment's reported EBITDA margin strengthened to 4.0% (2013: 3.2%). The main drivers behind the stronger EBITDA margin were a combination of growth in product revenues and improved margin on the hardware products.

Proposed dividend

Stable market growth

Segment Sweden (2014: 36% of group revenues) performed well in 2014, with growth in revenues from all business areas and regions. In addition, the segment's reported EBITDA margin improved to 2.9% (2013: 2.4%), reflecting increased gross margins on products. Growth in the latter years has primarily been driven by a deliberate strategy to take market shares in the public sector, through winning tendered public framework agreements. Pricing is an important parameter for winning such contracts and the strategy has therefore put gross margins under pressure. However, the negative margin trend was reversed in 2014.

Segment Denmark (2014: 26% of group revenues) generated stronger sales, helped by sound market conditions in the hardware market, which had a spill-over effect on services. Moreover, the segment's profitability improved owing to tight focus on operational costs. Consequently, the segment's reported EBITDA margin strengthened to 5.5% (2013: 4.9%).

The group's net debt (including pension liabilities) nearly doubled during 2014, ending the year at NOK 830m (2013: NOK 420m). The group's sound operating cash flow of NOK 959m was more than offset by a dividend of NOK 622m and acquisitions of businesses amounting to NOK 457m. Consequently, the net debt to EBITDA and total debt to capitalisation ratios weakened to 0.9x and 28% (2013: 0.6x and 25%), respectively.

As of year-end 2014, Atea's aggregated liquidity reserve amounted to about NOK 2,443m, comprising cash at hand of NOK 583m and undrawn short-term credit facilities of NOK 1,860m. The available liquidity reserve, restricted by financial covenants, was around NOK 1,628m.

Source: Company data and Nordea Markets

The board of directors proposes to the General Meeting a dividend of NOK 6.50 per share, to be paid in two equal installments of NOK 3.25 in May and October 2015. Based on the number of shares outstanding at the end of 2014, this corresponds to an aggregated dividend payment of NOK 676m.

According to market estimates from IDC, the market for IT infrastructure and related services in the Nordic region grew at a rate of about 3% per year during 2007-14. Atea expects that the overall market for IT infrastructure will continue to grow in the years to come, driven by continued technological development and need for more advanced IT systems.

Credit profile considerations

Supportive business risk profile elements

The business risk profile is supported by:

- Strong market positions in the Nordic region
- Diversified client base
- One-stop IT infrastructure provider
- Relatively stable cash flow patterns.

Challenging business risk profile elements

The business risk profile is challenged by:

- Highly fragmented industry with intense price competition
- Risk of cost and salary inflation
- Low-margin business operations
- Significant amount of intangible assets on the balance sheet
- Risk of more aggressive dividend policy.

Fair business risk profile

We are of the opinion that the overall business risk profile associated with Atea can be considered Fair, according to the below "expanded rating matrix" from Standard & Poor's. Our assessment reflects Atea's smaller size, lower level of diversification (both operational and geographical) and weaker margins compared to industry peers.

Modest financial risk profile

Our opinion is that the financial risk profile associated with Atea can be considered as Modest. According to the guidelines from S&P, we evaluate credit ratios on a time series basis, and we consider the group's credit ratios for the previous two years, as well as the current year's forecast.

Adjusting reported debt for pension liabilities

We adjust Atea's reported debt by adding pension liabilities.

Disclaimer and legal disclosures

Origin of the publication or report

This publication or report originates from: Nordea Bank AB (publ), Nordea Bank Danmark A/S, Nordea Bank Finland Plc and Nordea Bank Norge ASA (together the "Group Companies" or "Nordea Group") acting through their unit Nordea Markets.

The Group Companies are supervised by the Financial Supervisory Authority of their respective home countries.

Content of the publication or report

This publication or report has been prepared solely by Nordea Markets.

Opinions or suggestions from Nordea Markets credit and equity research may deviate from one another or from recommendations or opinions presented by other departments or companies in the Nordea Group. This may typically be the result of differing time horizons, methodologies, contexts or other factors.

Investment opinions, ratings, recommendations and target prices are based on one or more methods of valuation, for instance cash flow analysis, use of multiples, behavioural technical analyses of underlying market movements in combination with considerations of the market situation and the time horizon. Key assumptions of forecasts, ratings, recommendations, target prices and projections in research cited or reproduced appear in the research material from the named sources. The date of publication appears from the research material cited or reproduced. Opinions and estimates may be updated in subsequent versions of the publication or report, provided that the relevant company/issuer is treated anew in such later versions of the publication or report.

Validity of the publication or report

All opinions and estimates in this publication or report are, regardless of source, given in good faith, and may only be valid as of the stated date of this publication or report and are subject to change without notice.

No individual investment or tax advice

The publication or report is intended only to provide general and preliminary information to investors and shall not be construed as the basis for any investment decision. This publication or report has been prepared by Nordea Markets as general information for private use of investors to whom the publication or report has been distributed, but it is not intended as a personal recommendation of particular financial instruments or strategies and thus it does not provide individually tailored investment advice, and does not take into account the individual investor's particular financial situation, existing holdings or liabilities, investment knowledge and experience, investment objective and horizon or risk profile and preferences. The investor must particularly ensure the suitability of an investment as regards his/her financial and fiscal situation and investment objectives. The investor bears the risk of losses in connection with an investment.

Before acting on any information in this publication or report, it is recommendable to consult one's financial advisor

The information contained in this publication or report does not constitute advice on the tax consequences of making any particular investment decision. Each investor shall make his/her own appraisal of the tax and other financial merits of his/her investment.

This publication or report may be based on or contain information, such as opinions, recommendations, estimates, price targets and valuations which emanate from Nordea Markets analysts or representatives, publicly available information, information from other units of the Group Companies or other companies in the Nordea

To the extent this publication or report is based on or contain information emanating from other sources ("Other Sources") than Nordea Markets ("External Information"), Nordea Markets has deemed the Other Sources to be reliable but neither the companies in the Nordea Group, others associated or affiliated with said companies nor any other person, do guarantee the accuracy, adequacy or completeness of the External Information.

The perception of opinions or recommendations such as Buy or Sell or similar expressions may vary and the definition is therefore shown in the research material or on the website of each named source

Nordea Group or other associated and affiliated companies assume no liability as regards to any investment, divestment or retention decision taken by the investor on the basis of this publication or report. In no event will entities of the Nordea Group or other associated and affiliated companies be liable for direct, indirect or incidental, special or consequential damages resulting from the information in this publication or report.

Risk information

The risk of investing in certain financial instruments, including those mentioned in this document, is generally high, as their market value is exposed to a lot of different factors such as the operational and financial conditions of the relevant company, growth prospects, change in interest rates, the economic and political environment, foreign exchange rates, shifts in market sentiments etc. Where an investment or security is denominated in a different currency to the investor's currency of reference, changes in rates of exchange may have an adverse effect on the value, price or income of or from that investment to the investor. Past performance is not a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. When investing in individual shares, the investor may lose all or part of the investments.

Companies in the Nordea Group, affiliates or staff of companies in the Nordea Group, may perform services for, solicit business from, hold long or short positions in, or otherwise be interested in the investments (including derivatives) of any company mentioned in the publication or report.

To limit possible conflicts of interest and counter the abuse of inside knowledge, the analysts of Nordea Markets are subject to internal rules on sound ethical conduct, the management of inside information, handling of unpublished research material, contact with other units of the Group Companies and personal account dealing. The internal rules have been prepared in accordance with applicable legislation and relevant industry standards. The object of the internal rules is for example to ensure that no analyst will abuse or cause others to abuse confidential information. It is the policy of Nordea Markets that no link exists between revenues from capital markets activities and individual analyst remuneration. The Group Companies are members of national stockbrokers' associations in each of the countries in which the Group Companies have their head offices. Internal rules have been developed in accordance with recommendations issued by the stockbrokers associations. This material has been prepared following the Nordea Conflict of Interest Policy, which may be viewed at www.nordea.com/mitid.

Important disclosures of interests regarding this research material are available at: http://www.nordea.com/equitydisclosure
